After trying several php developers to no avail on PPH, I would say Rajnish is by far the most reliable and result oriented developer on PPH. If you are in search for value for money hoorie which has anything to do with payment integration or any web development works as a whole. I strongly recommend Rajnish. You will never be disappointed. I can't wait to contact him for my next project.
In short, Rajnish is the one stop shop for all payment integration solutions on PPH.
