A detailed overview of the company

- **Introduction**

Cad Design Enterprises, Inc. is supporting clients with design and Engineering in quite a variety of industries and markets.

- Automotive - Consumer Products – Electrical / Electronic -
- Medical / Dental – Food & Beverage – Metal / Plastic Container –

Our earlier involvement consisted of the designing and building for Industrial Tooling such as Plastic Molds and Die Cast Dies and the design of Metal Progressive Dies. Also metal container tooling for the Can Industry. Contact manufacturing and connectors for Method Electronics, Molex etc.

This knowledge and experience eventually led to the tasks in Product Design, Development and Prototyping, to take care of the complete manufacturing process for the client.

It is part of our business to help the client in all aspects.

We work with associates in the electrical and electronic field.

Also partner on projects as needed, regarding FEA analysis and other engineering fields. We also use prototype production facilities to accomplish initial preproduction runs, to test tooling and assembly operations.

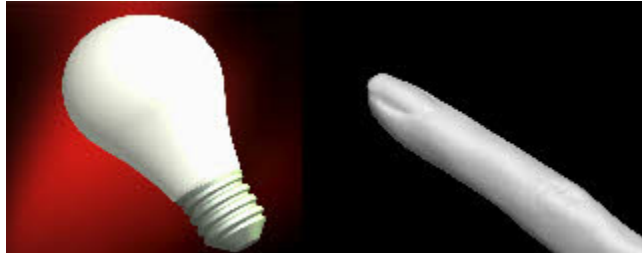

We are competent, dependable and well organized. We can be trusted to assist you with achieving your goals and are proud of our organization (really enjoy working here). Your business solutions are our primary focus. Your success and profitability is why we exist and how we have provided design excellence for over 25 years. Our goal is to *Exceed Your Expectations*.

Cad Design Enterprises, Inc.
CREATIVE - DEDICATED - DIVERSIFIED
