

## PROFILE:

6 years of working experience.

Expert in Internet Technologies and Client-Server applications, using latest technologies, tools to ensure quality, efficiency and cost effectiveness to establish robust application architecture that deliver near-term functionality while providing a solid foundation for long term capability expansion.

## Skill Set

Scripting Language	PHP, ASP 3, JavaScript, AJAX, JQuery, VBScript, HTML, DHTML, XHTML, XML
Front-End (GUI)	VB 6, Visual FoxPro, D2K
Back-End RDBMS	MySQL, MS-SQL Server, Sybase, MS-Access
Web Tool	FrontPage, CoffeeCup, ACDSsee, Ulead Cool 3-D, Ulead GIF Animator, Applet Generator.
Web Server	PWS, IIS, Apache.
Report Writer	Crystal Report.
DBMS	CA-Clipper, FoxPro, FoxBase, dBASE-IV.
Languages	C, COBOL - 74.
Macromedia	Dreamweaver, Swish
Operating System	Windows x.x, MS DOS x.x
Others Knowledge	PhotoShop, MS-Office, Xara. InstallShield, VSS

## Hardware

Networking, network cabling, installation of new hardware & its appropriate driver, addition of RAMMemory. HDD, FDD, cards, cams, power cabling with ID card etc.

## Experience

1. Worked as a **PHP Team Leader**. I have to analyse project, design database, communication with client, assign module to team member, design prototy, coding, testing, debugging, maintain daily project status etc.

2. Worked as a **Sr. PHP Developer**

My basic responsibility is to visit client side if client is a domestic, else gather initial project details from outsource client with the help of teleconference, email, chatting etc. Developing project document, DFD, system flow, link flow, page flow, database, table relations, coding, and testing, debugging, uploading and final test on live server.

3. Worked as a **Sr. Software Engineer**

I have to design database, system flow, DFD, how links flows and page wise flow with my Project Leader. Then create database, establish relationship between tables, etc. Then we will start admin panel, test, debugging. Also modification as per client desire and uploading modules. If everything is alright then we will start same step with front side and upload it.

4. Worked as a **Software Engineer** with Kaushalam Technology in Ahmedabad

## **I head TEAM LEAD of three employees in two project <http://www.movingannouncementstore.com> and <http://www.babyshere.com>**

In my job I have to understand client requirement. Then I will start initial step of document creation. In document creation I will mention overview of project, system flow, DFD, how links appears and page wise flow. Then write down database schema with relation ship diagram. After approval of page design layout from client, I have to start admin panel, test, debugged, modification as per client desire and uploading modules. If everything is alright then we will start with front side and upload it.

## Areas of Interest

- System Analyst / Executive.
- Web Programmer / Development / Web Application
- Programmer / Database Programming.
- EDP / Manager-IT / IT Administrator / Technical Support.
