Desktop Applications

Payroll

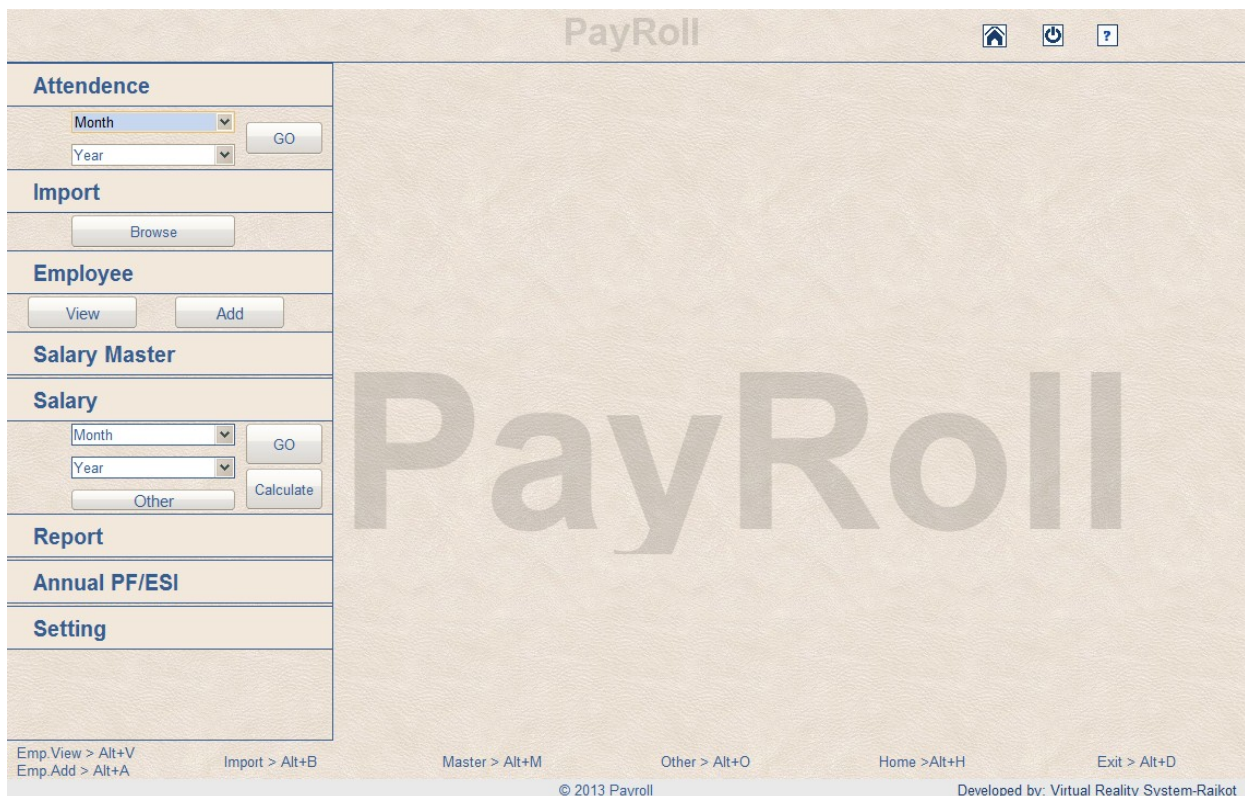

Technology: Java - MySQL

About

Allows employers to manage employees' details and their salary.

Application Features

1. Facility to import time based attendance using Excel Sheet
2. Auto calculates salary based on number of days and time-in / time-out
3. PDF reports for all most all the screens
4. Facility to set salary type and different heads for different employees
5. Can manage permanent and temporary employees
6. Light-weight and user friendly.

The screenshot displays the PayRoll application interface. The title bar at the top reads "PayRoll" and includes standard window control icons. The main window is divided into a left sidebar and a large central area. The sidebar contains several menu items: "Attendance", "Import", "Employee", "Salary Master", "Salary", "Report", "Annual PF/ESI", and "Setting". Each menu item has associated sub-options or buttons. For example, "Attendance" has "Month" and "Year" dropdowns and a "GO" button. "Import" has a "Browse" button. "Employee" has "View" and "Add" buttons. "Salary Master" has "Month" and "Year" dropdowns, a "GO" button, and a "Calculate" button. "Report" has "Annual PF/ESI" and "Setting" sub-items. The central area is mostly blank, with a large, faint "PayRoll" watermark. At the bottom of the window, there is a status bar with keyboard shortcuts: "Emp.View > Alt+V", "Emp.Add > Alt+A", "Import > Alt+B", "Master > Alt+M", "Other > Alt+O", "Home > Alt+H", and "Exit > Alt+D". The copyright notice "© 2013 Payroll" and the developer information "Developed by: Virtual Reality System-Rajkot" are also present.

[#top](#)

Work Monitoring System
