12 people have recommended Jana

"Jana is a smart guy who understands how to take an idea and make it a reality on a website. He designed for me an auction site that was very complicated and over time we achieved what we were seeking. The sheer task of an auction site is no easy task and Jana and his team were able to take my idea and make it work the way I wanted. I recommend him and his knowledgeable team!"

— **Haris Hanifi, MBA**, was Jana's client

"Jana and his brilliant crew of software developers were instrumental in creating a product without rival for the US Navy. His unique understanding of customer needs and his ability to translate those needs into technical terms is a marvel to behold. I will use him for any software development project that I have to manage."

— **Marci Dobal**, *Sr. Program Manager, Competitive Innovations, LLC*, was with another company when working with Jana at MSITL

"Jana has one of the most impressive team creating, developing and implementing custom applications anywhere to be found. They are GOOD and Jana has a management process that ensures NOTHING falls between the proverbial cracks once they are working with you. The attention to detail and the honesty of all the people in his organization is superb. When Jana is working with you there is a calming assurance that things will be done on time and CORRECT the first time. He has never disappointed us and has my strongest endorsement as a partner you will want to work with if given the chance."

— **Ed Hale**, *CEO, CompeteSoft (edhale@competesoft.com)*, was with another company when working with Jana at MSITL

"Jana is a hard working and trustworthy professional who marshals any and all resources to get a project moving and delivered on time and on budget."

— **Eric Linxwiler**, was Jana's client

"Jana/Manisoft International has demonstrated itself to be highly competent and willing to take the steps necessary to make us happy with several programming projects in the last two years. We continue to turn to them for support and additional programming as the needs arise."

— **Todd Hinker**, was Jana's client

"I have been associated with Jana as a business partner over 2 years now. Jana is quite entrepreneurial and visionary and at the same time is hands on in executing the strategies by rolling up his sleeves. He is very easy to deal with and is man of his words when it comes to business partnerships. He gives out his best to ensure a smooth working relationship which is a key to a successful partnership and to deliver results. I also found Jana to be quite knowledgeable in technology in terms of costs, what works/does not work and when and where as well as where it is heading - he is ahead of the curve in general."

— **Raja Kasilingam**, *Founder and President, CargoINTEL*, was with another company when working with Jana at MSITL

"I've used Jana's company (MIT) on several occasions and his team has provided an excellent service at reasonable cost."

— **Carmelo Vuodi**, was Jana's client

"Jana and his team worked with our firm on several important projects and consistently delivered great results."

— **Mike Kennedy**, was Jana's client

""I hired the MIT team to build the Shoes 'R Us site really without giving them a whole lot of direction. Jana and his team took the project from the ground up, from page design, to writing their own comparison algorithms, to uploading massive product catalog files, to hosting, to back-end support. As you can see, the finished project is impressive! They were responsive to email inquiries and my many "debugging" requests. The MIT team worked diligently to resolve any misunderstandings and miscommunications, and ultimately produced a very professional site and robust admin site for me. I plan on contracting with them again for future projects.""

— **Nick Loper**, was Jana's client

"Jana and his team provide superior service and excellent results. They never missed a deadline, could change course quickly, communicating efficiently and effectively and were totally dependable. In the world of Information Technology providing solutions to our customers is complex and always changing. It's a stressful world and difficult to consistently meet and exceed customer expectations -- Jana helped us meet our goals - where results are critical. Jana's team is first on our call list for building robust IT solutions in dot net and J2EE."

— **Michelle Youngers**, was Jana's client

"Jana has provided not only excellent results with the work he has done but in addition he has demonstrated a clear understanding of his clients needs and works towards fulfilling those needs in a timely and cost efficient manner."

— **Frank Westall**, was Jana's client

"I found Jana to be very hard-working and knowledgeable. He had a very entrepreneurial spirit and it was a pleasure to know and work with him."

— **Premkumar Stephen**, *Software Engineer, Tata Infotech*, worked with Jana at Tata Infotech
