Results-driven and experienced Front End Developer and Principal Engineer with a solid background in B2B and B2C software development. Over 12 years of hands-on experience, transitioning from Android to React Native development, and successfully building multiple products/projects from inception to launch. Adept at driving cross-functional teams and delivering innovative solutions. Looking for a Leadership/Managerial role in the Engineering/Product department.

Professional Experience

Tech Lead (Principal Engineer)

01/2022 to Present

Skin Inc (+SABI AI Corp)

Remote

I am working here as Tech Lead (Principal Engineer) building the product +SABI AI. This is a mobile app built to engage consumers providing AI based selfie face diagnosis and recommend custom products based on their skin scores. The app also has health and fitness tracking features and a forum to discuss skin problems and solutions. Skin Inc also offers a hand held device called Tri-Light which is used to perform facials via LED lights at home. The +SABI AI App connects to this device via Bluetooth and helps control the device and track treatments. The app has an in-built e-commerce platform through which users can purchase their recommended and general products.

Senior Software Engineering Manager - Research and Development

05/2017 to 01/2022

Kerb

Remote

Started my career in this awesome startup as a software engineer and worked my way up to Engineering Manager, Deployment Manager, and then Senior Software Engineering Manager - Research and Development. I also soft-launched our product in India, which consisted of meeting with clients and partners and handling marketing campaigns.

Software Engineer

12/2016 to 04/2017

RS Software Kolkata, India

RS Software is a payment domain-focused company. I was a part of a super-efficient team in this company working on their own product; PayAbhi wallet. Here I acquired knowledge on how payments work and the ways to make the user experience stress-free.

Manager - Software Development (Mobile)

09/2014 to 12/2016

Navitas

New Delhi, India

Navitas is one of the world's largest education management companies. I joined this company as an Android Developer and eventually got promoted to the rank of Manager - Software Development (Mobile). I was responsible for building and maintaining Navitas' in-house apps for their employees and students. I got the opportunity to architect and create a social networking app called Study Story for the students of Navitas.

Senior Executive Software Developer

03/2013 to 08/2014

ICA Edu Skills Pvt. Ltd.

Kolkata, India

ICA is an institution providing computer education to its students. I was working on their in-house applications for staff and students. I was a member of their EDP team and worked closely with other front-end and back-end developers to create awesome apps.

Software Engineer

08/2012 to 02/2013

CyberSWIFT

Kolkata, India

CyberSWIFT is an IT services company and I was working here on the Android platform. Here I got the opportunity to work on government and GIS-based projects.

Technical Executive and Developer

02/2012 to 08/2012

Crews Infotech Pvt. Ltd. Kolkata, India

This was the company where I started my career as a Software Engineer. Here I got the chance to play with the Android platform and start developing apps. I also got introduced to an ERP product and acquired the basic technical knowledge on how to architect one.

Java faculty

02/2011 to 01/2012

Aptech Kolkata, India

Aptech Limited is a pioneer in the non-formal vocational training business. I was working as a Java faculty here. My responsibilities were mainly taking classes of 30+ students and some student management jobs.

Awards

Toyota CATCH competition KL, Malaysia

07/2021

We are the winners of the City Architecture for Tomorrow Challenge (CATCH). Toyota Mobility Foundation (TMF) launched CATCH in February 2020 with a global call for dynamic, intelligent, and data-driven solutions to address mobility and city planning challenges in Kuala Lumpur.

Kerb Versatility Award

12/2019

I was honored to receive this award for my contribution to business and technology.

Toyota Hackathon

02/2019

I was a member of a team of four from Kerb Technologies Pty Ltd to participate in the Hackathon event. We successfully installed our React Native app in Toyota headboard units and achieved first place.

I hereby declare that the information provided in this resume is true, complete, and accurate to the best of my knowledge. I understand that any false statements or omissions may disqualify me from employment or result in termination if already employed.
