Profile for: Senior Programmer /Team Lead

Qualified IT Professional with an excellent 7+ years of experience in across various stage of SDLC development of Windows, Web based n-tier applications using OOA (Object Oriented Architecture) and SOA (Service Oriented Architecture) across diverse organizations. Proficient in simultaneously managing multiple projects in compliance to project SLA parameters; exploring challenging assignments with a professionally managed organization

Expertise in

▸ Development & Deployment
▸ Team Management
▸ Project Management
▸ Architecting & Designing
▸ Integrating Third party libraries
▸ Troubleshooting & Issue Resolution
▸ Effort Estimation
▸ Resource Utilization
▸ Client Relationship Management
▸ Scope & Release Management
▸ Agile SDLC process
▸ Quality Coding & Static Code Analysis

Education

▸ **BCA,** University of Madras, Tamilnadu, India (2004)

Executive Summary

✦ Having strong hands on experience in Web development using ASP.Net, RESTful API Design & Development, Distributed SAAS Solutions design & development, Windows 8 LOB application development, Kinect app development, Native/Cross Platform Mobile app design & development and Adobe Flex development

✦ Expertise in building solutions using .Net (C#), ASP.Net, ASP.NET MVC, ASP.Net WebAPI, Entity Framework, SQL Server 2008 & R2, WPF, WCF, RESTFul Services, Winforms, Socket Programming, Java for Android, Action Script 3.0, HTML 5, CSS 3, Javascript, jQuery, Angular JS & SAP UI5, ABAP and oData.

✦ Hands on Experience on adapting and implementing various Design Patterns and UI Patterns (MVC & MVVM)

✦ Good understanding on CI & CD process.

✦ Adept at collation & development, coding, testing & debugging of applications in different software languages, identification of new technologies for implementation, software modeling and simulation

✦ Industry expert having keen understanding of Project / Client Requirements coupled with hands-on exposure in handling all phases of Project / Program Life Cycle, right from requirement analysis, project scoping, planning & scheduling to the implementation of robust technology solutions within time, budget and quality

✦ Efficient Team Leader & Player, combining communication, interpersonal & problem solving skills with analytical, decision making and leadership capabilities to enhance organizational objectives

Key Projects:

Project	MyOutcomes and BCGaming
Duration	20 months - Ongoing
Technology used	.NET 4.5, ASP.NET MVC, Angular JS, JQuery, C#, SQL Server, Socket Programming
Description	MyOutcomes is designed for use in agencies and offers multilevel access and advanced client outcome management tools for administrators, supervisors and clinicians. MyOutcomes offers integration with electronic health records, customized training and consultation packages related to patient mental health.

Project	AliveForWellness
Duration	3 months
Technology used	Angular 2, HTML, CSS, .NET 4.5 C#, SQL Server,
Description	AliveForWellness is platform for learning and training online related to Psychological. It has set of programs/quiz online which can be utilized by patients to take training and track the outcomes online for reporting purpose.

Project	Pluck
Duration	18 months
Technology used	.NET 4.5, ASP.NET MVC, JQuery C#, No SQL file-based document store
Description	Pluck is a SAAS based web application hosted in Amazon (AWS). Pluck includes a broad collection of community applications that can be used in any combination, anywhere on your site, to create the precise experience you need. And Pluck applications are designed to work equally well in your web and mobile destinations. Also, Pluck exposes SDKs for JavaScript, PHP, Java, Objective C, .NET & Python platforms.

Project	MedPOS
Duration	13 months
Technology used	SAPUI5, JavaScript, OData Services, ABAP, Apache Cordova & SQLite
Description	A mobile and web based Pharmacy POS application, integrated with SAP ERP for inventory & Finance, SAP IS-H (Healthcare) for creating patients, Prescription, HAAD (Health Authority of Abu Dhabi) and DHA (Dubai Health Authority) with online insurance claim approval

Project	Taqyeem
Duration	10 months
Technology used	.NET 4.5, JQuery, ASP.NET MVC, C#, Android Java (Android devices) and RESTful Services
Description	A survey application built specifically for UAE market for conducting surveys with a variety of question types and consisting of two software modules. Taqyeem HUB web based application used to create, design & manage surveys and devices. Taqyeem mobile based application to download, conduct surveys and upload the results back to server

Project	Surface CMS
Technology used	.NET 4.5, Windows 8, WPF, RESTful Services
Description	Surface CMS is an extension application of existing workflow web application for windows 8 surface to enable mobility. The integration between the surface application and the server was implemented using RESTful services.

Project	AIR
Technology used	Kinect, .NET 4.5, WPF, RESTful Services
Description	AIR is a hands-free, data interaction tool for healthcare providers, which incorporates intuitive interaction by voice command, gesture and information interaction into healthcare using Microsoft Kinect®.
