Projects:

1. **Student Management System:**

In this project, we have made Student Permission Based Management System for **CTS** (code training services), Islamabad in **HMVC** pattern to manage different operations. The objective of this project is to computerize student's record of **CTS**. In this system, we have multiple modules such as **Student Management System, Requisition Management System, and Leave Management System.**

2. **Leave Management System:**

There is a need to automate Leave application process. Currently all these processes and their data were either maintained in hard printed/handwritten copies, scattered in emails or excel sheets.

The objective of those projects is to automate the internal business processes and maintain a database of all the records related to:

Employee Leave Management

3. **Cagetix:**

Cagetix is the first group sales service in the world to focus specifically on mixed martial arts, and the athletes who put it all on the line. By allowing consumers to target a specific athlete in a promotion, and awarding that athlete with a percentage of that ticket sale, you are able to put money directly into the pocket of the fighter that you have come

To see this, coupled with ease of purchasing your ticket at home, and the security of trusted online processing, allow a victory both inside and outside of the cage.
