## Open Source & E-COMMERCE Project

- ✓ <http://www.corsets-uk.com> (Integration with Amazon and Ebay)
- ✓ <http://www.foodmandi.com>
- ✓ <http://creativeenergycandles.com/> (Update from 1.3 to 1.7)
- ✓ <http://www.angelcorset.com>
- ✓ <http://www.getblinds.com>
- ✓ <http://www.stagbeing.com>
- ✓ <http://www.tatoobazaar.com>
- ✓ <http://www.corsets-au.com>
- ✓ <http://www.korsetts-de.com>
- ✓ <https://www.shoptoylife.com>
- ✓ <http://www.motect3.co.uk>
- ✓ <http://primalfitnesssequipment.co.uk>

### Third Party Integration in Magento.

1. **Payu Payment Gateway**
2. **SMS API**
3. **Amazon and Ebay Integration**

### In CS-CART Project

<https://www.corsetwholesale.com/>

### In Wordpress Project

<http://www.uthmag.com/>

<http://youthfulimages.com/>

### **PREVIOUS PROJECT DETAILS:**

Magento Modules what I have used: - Live support, Custom Option Images, backorderbutton\_1.0, discount10on review, camiloo Amazon or eBay, Custom option script for uploading and downloading data etc

1. Project Name: Corsets-uk(with multiple domain, multiple currency) bridge with Amazon and eBay products

Site: Corsets-uk.com

Environment: ZEND, Magento, Java Script

Database: MySql

Responsibility: User interface development and Database designing, Client Integration.

Corsets-uk is a ecommerce application for selling corsets. It is for wholesale and retail selling. There is different category of the products having different attributes. User can select products of their choice and add to the cart. On checkout the cart he can make payment in PayPal and return to website then he got invoice detail. For managing all this things there is admin panel. In this section admin can add, delete and update product. He can check order and make product ship to the shipping address. He can also manage the PayPal account through this.

### 2. Project Name: get blinds

Team Size: 1 Persons

Site: <http://getblinds.com>

Environment: ZEND, Magento, Java Script

Database: MySql

Responsibility: User interface development and Database designing, Client Integration.

**get blinds** is a ecommerce application for selling blinds. It is for wholesale and retail selling. There is different category of the products having different attributes. User can select products of their choice and add to the cart. On checkout the cart he can make payment in PayPal and return to website then
