Dillon Breytenbach

Solutions Architect @ DashSquared
Johannesburg, Gauteng, South Africa

Summary

Innovating with AI at DashSquared, I focus on crafting solutions that drive efficiency and growth across industries. My expertise is highlighted by my ability to design AI tools tailored to unique operational needs, utilizing:

- > Zapier & Retool for seamless automation and integration.
- > GitHub Copilot & Postman to enhance development processes.
- > Azure Enterprise for comprehensive cloud solutions.
- > Cybersecurity Tools ensuring data security.
- > Social Media Management platforms for effective digital strategies.

I am committed to leveraging technology to deliver scalable, secure solutions that improve decision-making and streamline operations. Engaging with the tech community, I am always on the lookout for innovative tech advancements and collaborative opportunities.

Experience

Dash Squared

System Architect

August 2023 - Present (8 months)

I lead the development of innovative AI solutions, leveraging a diverse toolkit including OpenAI, Zapier, Retool, and Azure to tailor advanced technologies that enhance business operations and decision-making.

My expertise in solutions architecture and project planning drives efficiency and growth, ensuring our clients' unique needs are met with secure, scalable, and customized technological innovations.
