## Experience

### **Co-Founder & CTO at Bizician Tech Solutions Pvt. Ltd.**

June 2013 - Present (1 year 4 months)

- In partnership with the company's other founders, identify opportunities and risks for delivering the company's services as a web-based business, including identification of competitive services, opportunities for innovation, and assessment of marketplace obstacles and technical hurdles to the business success.
- Identify technology trends and evolving social behavior that may support or impede the success of the business.
- Evaluate and identify appropriate technology platforms (including web application frameworks and the deployment stack) for delivering the company's services.
- Lead strategic planning to achieve business goals by identifying and prioritizing development initiatives and setting timetables for the evaluation, development, and deployment of all web-based services.
- Promulgate coding conventions and documentation standards.
- Review current best practices for the selected web framework and establish the initial architecture for the application.
- Establish and supervise the software development process, setting short-term objectives and assessing progress as defined by the selected software development methodology.
- Establish an application deployment process and supervise deployment to staging and production servers.
- Establish and monitor a web analytics regime that measures site traffic and application usage relative to business goals.
- Maintain up-to-date knowledge of technology standards, industry trends, emerging technologies, and software development best practices by attending relevant conferences and reading widely reading peers' blogs!.
- Ensure that technology standards and best practices are maintained across the organization.
- Develop, track, and control the development and deployment annual operating and capital budgets for

purchasing, staffing, and operations.

## 2 people have recommended Abhishek

"While I have only known and worked with Abhishek for one year, I found him to be very good at analyzing existing code and making recommendations concerning direction on projects. He is extremely pleasant to work with and always willing to share his knowledge. In addition, he welcomes constructive criticism from his peers which I deem as a respectful quality in a person that shows he is eager to learn from others. He is willing to push the limits of his own knowledge, has the ability to think out of the box and drive for results yet remaining receptive to the ideas and concerns of his team mates and colleagues. But apart from all these qualities the biggest and most important quality is that Abhishek demonstrates an emphatic commitment and appetite for continual self-improvement."

— **Ankit Agrawal**, *Systems Engineer, Tata Consultancy Services*, managed Abhishek indirectly at Tata Consultancy Services

"Abhishek is a result oriented person and few qualities are listed below; 1. Uses sound judgment to generate and evaluate alternatives and determine optimal solutions. 2. Ensures projects are being completed according to the goals of the organization. 3. Displays a high-level of initiative, effort and commitment to ensure the completion of assignments and project in a timely manner. 4. Adjusts effectively to work within new work structures, processes, requirements or cultures. 5. Makes customers and their needs a primary focus of one's actions and develops and sustains productive customer relationships. 6. Considers how actions will affect customers, responds quickly to meet customer needs and resolves problems. Monitor quality of output to ensure freedom from error, omission or defect."
