

The Site Genie

creating website magic!

Hi, I'm a seasoned professional web designer and developer. I have worked with many large fortune 500 companies as well as small business owners. Among the various web technologies I specialize in are WordPress, PHP, HTML5, CSS, JavaScript, JQuery, Bootstrap, MySQL, SQL and others.

I'd really like to create a custom website for you that you can be proud of. You need to promote your business or the professional polished appearance that will engage clients and customers.

It pays dividends to do things the right way by working with an experienced website expert. Together we can make magic — creating the website that matches your “vision”, and that elevates your business to the next level.

Regards,

Gloria Cúrran
