Projects

Picturize
Image managing system for pictures taken by photographers using their phones. The platform built makes it easy to participate in photography competitions using a mobile app, which is uploaded to the platform instantly.
Framework: Angular, Parse
URL: http://picturize.dk/

LetRegnskab
An auditing tool built in NodeJS using AngularJS that allows to pull accounting data via APIs from e-conomic to map accounts within the income statement, balance sheet and tax statements. Once mapped, with only one click of a button the client can get audited annual accounts. It takes 5 minutes rather than 10 days for an accountant!
Framework: AngularJS
URL: www.letregnskab.dk
