**Michał Iskierko**

Senior Software Engineer

## Michał Iskierko

Senior Software Engineer

I studied Computer Science at the Lublin University of Technology. I started my career in ViP Interntional company as a C++/Qt developer. After 2 years I settled down in Warsaw and started working as a C++ developer in Autogard S.A. I took part in many interesting projects: a car navigation system, a car fleet management system, communication terminals, GIS applications. I am interested in application design, programming, mobile and embedded systems. I am a big fan of the C++ programming language. I have always tried to be up-to-date with C++ and grasp some new knowledge about it. I also love Linux and the Qt technology.

I am a marathon runner and a triathlete. I have a beautiful wife and two great children.

## Skills

C++	9/10	C	9/10
Qt	9/10	QML	9/10
SQL	7/10	Python	7/10
PySide/PyQt	7/10	Java	6/10
C#	6/10	bash	6/10

## Education & Training

**Lublin University of Technology**

2003–2008

Computer science

## Experience

Years: 5

**Vip-inter**

2010–2012

C++/Qt developer

**Autoguard**

2012–2015

GIS projects - C/C++/Qt/Java/C#/Embedded Linux/TCP communication

## Courses and certifications

**CAE**

May 2009

Certificate in Advanced English

# Projects in Milo

## Arise

Middle and Backoffice solution for stockbrokers. It contains a wide variety of features such as settlements management, reports generation, accounting and communication with KDPW. It can be tailored to individual clients' requirements. More information: [www.arise.pl](http://www.arise.pl)
