

Curriculum Vitae

Yakovenko Danil

Senior Software Developer / Project Manager / Team Lead

<i>Contact information</i>	Skype: danskyy e-mail: yakovenko@softproject.com.ua
<i>City of living:</i>	Kryvyi Rih City, Ukraine
<i>Personal data:</i>	Date of birth – 27.04.1982 Married Inquisitive, honest, responsible, organized, intelligent, communicative

<i>A few words about myself:</i>	Experience of software development 15+ years. During this time I participated in projects different level of complication as a software developer and as a project manager. I always attach maximum efforts for go deeply into subject area of developing project, to guess needs of client before he compose it himself and propose the best solution. I prefer to work in team of reliable and approved developers
<i>Interests:</i>	Family, IT & programming, skiing music, theatre, arts, reading.

Other Experiences

Team lead, Project Manager, Product Manager

Since 2004 under my leadership have been developed and successfully implemented several projects (desktop apps, client-server and multi-tier ERP/CRM systems).

Database design. SQL programming

I have much experience on next database systems: Firebird SQL Server, MS SQL Server, PostgreSQL, MySQL. My knowledge are not limited just general SQL. I know these RDBMS servers in deep and able to perform significant optimization of queries, stored procedures and schema of course. Also I have experience of replication of databases and clustering of database servers. There are a lot of project of variable scale and purposes in my practice. Some of them listed in my portfolio.

Database administration and optimization

I perform DBA activities and SQL optimization tasks on number of projects (custom and domestic). There are DB server setup, setting of backing up of the server and the database, periodic analyzing of server log and proactive reaction on it among my duties as DBA. Refactoring and optimization of SQL queries and stored procedures are not the least in my work on all stages of project progress.

GIS development, digitization of maps from paper media, math modeling

My first experience (3 years in total) as a developer was developing of geo information systems namely mathematical modeling and calculations, and developing of a software to automatization of digitization of maps from paper media for mining industry.
