Summary

I am a web developer, graphic artist, technology enthusiast & recent graduate of Full Sail University living in Orlando, Florida. In the corporate world, I've developed branding for companies, communications, and advertising via logo design, web development and screen-printing. Along with my many other digital aspects, I am also passionate about film, animation, and photography.

Work History

Giant Eagle

May 2003 – August 2013
Johnstown, Pennsylvania

Titles: Customer Service, Photo Lab, Cashier, Stock, Trainer

Freelance Screenprinting

2008 – 2013

Digital DTG machine (direct to garment)

Created concept art and logos for a couple local bands, also did designs for a local 5k marathon.

Education

Full Sail University

Bachelor of Science Degree Web Design & Development

June 2013 – August 2015

**Courses Details @ www.CarmineTrovato.com
** Projects located @ https://github.com/ctrovato

Yatter Chat App AngularJS Project:

For this individual project I used AngularJS and Firebase for real-time data binding. I created a site where users can submit posts or have personal chats. I implemented Gamification where users gain points for blog posts and likes.

Property Link PHP Project:

For this individual project I used the Zillow API along with the google street view API to obtain images of the properties when none were provided. I used Laravel PHP framework for this application.

Grub Quest node.js Project:

For this group project we used node.js to recreate a Grub Hub site. We used the Locu API to obtain resturant data such as menu items prices, & restaurant location. We planned on searching restaurants by price range but were unable to complete that feature in a two week deadline.

Honors & Awards

Full Sail University Anniversary Scholarship

Full Sail University

Have been awarded a Full Sail Anniversary Scholarship

Merit Scholarship

Full Sail University

Have been awarded the Merit Scholarship
