

RAJA DUSHYANT VASHISHTHA

Experienced Java Developer

PROFESSIONAL SUMMARY

- A quick learner with a penchant for performing under pressure. Strong team player with excellent interpersonal and communication skills, and strong analytical and problem-solving skills.
- Overall 9+ years of experience in the development of Web Enterprise applications using JAVA and J2EE.
- Hands-on experience in Kotlin, Core Java, Spring, SpringBoot, SpringMVC, Hibernate, JSP, JSF, JDBC, and JPA.
- Hands-on experience with Databases like NoSQL – MongoDB, PostgreSQL, SQL, etc.
- Deeply experienced with AWS EC2, S3, Lambda, etc.
- Well experienced with DevOps like CI (Jenkins, Hudson, TravisCI).
- Hands-on experience with Git, Subversion, BitBucket, and VCS version controls.
- Great experience with Project Management tools JIRA, Trello, Asana, and Tuleap.
- Extensive experience in testing platforms like Jasmine, Karma, Junit, and Mockito.
- Highly proficient in working with Eclipse and IntelliJIdea.
-

TECHNICAL SKILLS

BACKEND LANGUAGES

Java, Spring, SpringBoot, SpringMVC, Hibernate, Play, Jersey, Kotlin, Dropwizard, NodeJs, ExpressJs

BUILD AUTOMATION TOOLS

Gradle, Jenkins, Docker, TravisCI, Apache Maven, Ant

DATABASES

NoSQL - MongoDB, MySQL, PostgreSQL, Oracle

WEBSERVICES/ MICROSERVICES

REST/SOAP in JSON/GSON, Oauth

CLOUD PLATFORMS

Amazon Web Services (S3, EC2, EB, RDS, Lambda), Heroku

IDE

Netbeans, Eclipse, IntelliJ

OTHERS

ElasticSearch, GWT, LDAP, JBPM, Apache Camel, Apache Kafka, NodeJs

TOP PROJECTS DESCRIPTION

LEANSACE (<https://leanspace.io/>)

Major Technologies: Java, Spring Boot, Microservices, AWS, PostgreSQL, GraalVM, Kaitai-struct

Description: Gain full control of your mission planning, satellite control and flight dynamics systems. Natively integrate them together and automate your constellation operations. Accomplish all with Leanspace.

LETSHEGO (<https://www.letshego.co/>)

Major Technologies: Java, Springboot, Kotlin, AWS, Kubernetes, Azure, PostgreSQL, React.js, HTML, CSS

Description: Letshego is one of the top financial service provider in Africa, It also provide users some banking services like send/receive money, wallet services, bill payments etc.

101 DIGITAL (<https://www.101digital.io/>)

Major Technologies: Java 8, Springboot, Kafka, Redis, PostgreSQL, Docker, Maven, OpenAP, Liquibase

Description: 101 is Fintech/Banking application. It is one of the best, global, 'banking as a service' platforms, that enables established banks, Neobanks and digital businesses to launch their digital products to market at speed.

QUICKGET (<https://quickget.jp/>)

Major Technologies: Kotlin, Java, Spring Boot, Hibernate, MicroServices, PostgreSQL, SwiftJS, AWS EC2, AWS Lambda, Amazon S3, Amazon RDS, AWS CloudWatch

Description: A large and Ecommerce and Marketplace application. Developer of a convenience store application designed to provide easy access to grocery and everyday necessities.

SYMPHONY (<https://symphony.com/>)

Major Technologies: Java, SpringBoot, SpringSecurity, Microservices, NoSQL-MongoDB, HBase, ZooKeeper, OAuth, Apache Kafka, Solr, Elastic Stack, REST, Docker

Description: We started out in 2014 as a messaging platform to solve data security and compliance, be an open architecture platform and facilitate real-time cross- company communication. Today, Symphony is the common connector for market workflows.

BLAZE (<https://blaze.me/>)

Major Technologies: Java, Dropwizard, React Js, NoSQL(MongoDB), AWS SQS, AWS SNS, Redux, Javascript, HTML, CSS

Description: A large and complex ERP system and Marketplace application with a Point of Sale (POS) approach. It utilizes the most sophisticated, cloud-based technology and security systems available, resulting in increased security, better productivity for dispensary staff, faster transaction times, and higher revenue for your dispensary.

ROLES & RESPONSIBILITIES

- Design overall architecture of the few web applications.
- Maintain quality and ensure responsiveness of applications.
- Maintain code integrity and organization.
- Experience working with graphic designers and converting designs to visual elements.
- Understanding and implementation of security and data protection.
- Write well-designed, efficient, and testable code in Java and Dropwizard.
- Developed Rich and Responsive UI's using advanced JavaScript libraries and
- Deployment of the application on AWS SQS/SNS and its regular management.
- Support continuous improvement.
- Swagger implementation
- Integration with Amazon S3
- Integration with third-party APIs like OnFleet, Tookan, Weedmap, Twilio, stripe, WePay, SpringBig
- Follow scrum processes on daily basis (Status update and Time log on JIRA, Sprint Planning, Sprint Backlog Refinement, Demo)
- Designed and developed Remote Integration Services using Core Java, Spring Boot, Spring Core, and EMS listener to the underlying customer event API.
- Used Junit, Mockito, Power Mockito framework, and Spring Boot inbuild functionality Spring Boot Test for unit testing.
- Used MAVEN automated build tool to compile and package the application and implemented Log4j, and Slf4j for logging in to the project.
- Designed and developed web applications using Spring Boot, Spring Core, Spring Security, Hibernate, Phone Sync API, and MySQL.
- Used JUnit, Mockito, and Power Mockito framework. Implemented Log4j, Slf4j for logging in the project.
