

Software Engineer | 9+ Years of Experience

Name: Bhavin Umeshbhai Sasapra

Objective

To secure a challenging role as a Project Manager in the IT field, leveraging my 9 years of development experience and proven project management skills to drive project success and organizational growth.

About the Expert

Highly motivated and results-driven Project Manager with 9 years of experience in the IT industry. Adept at leading and delivering complex projects on time, within budget, and to the highest quality standards. Possesses excellent communication and leadership skills, with a proven track record of building and managing high-performing teams.

Top Skills & Expertise

Backend

I prefer to use Laravel, or CodeIgniter with MySQL setup for restful APIs to create server-side logic with database operation like CRUD application to connect with frontend technologies powered by Apache or Nginx server.

Frontend

I am feeling good about JavaScript or React.JS to create responsive components with UI library like Material UI, Chakra UI and connect it with backend APIs to be working application.

Key Projects

1) Shipment Software & Services Application – Shifl.com

Duration: April-2022- Present

Technologies Used: VueJS, VUEX Store, NextJs, NodeJs, Python, PHP, Laravel, Laravel Nova, GitLab, Google Cloud Platform, Google Dialog Flow, AWS Textract, DropBox API

Description:

This is a Shipment software and services company. I worked as a Senior Software Engineer in the beginning for this company then managed some critical features and deployed successfully on live, Ex. Tracking with Terminal49 with real status, Booking with third party services.

Roles & Responsibilities: Project Lead/Software Engineer

2) Business Acquisition Loan Software

Duration: March-2021- April-2022

Technologies Used: ReactJs, Redux Store, NextJs, NodeJs, Python, PHP, Laravel, GitLab, Google Cloud Platform, Google Dialog Flow, AWS Textract, DropBox API

Description:

This is Small Business Acquisition software where client can communicate with automation bot (AI) and can send their details to server. Server will send automation emails and user can login with one click from email.

In dashboard they have to upload few documents to pre-qualify ourself, in background we will take each details from uploaded document and store in server and notify them either they are qualified for loan or not.

Roles & Responsibilities: UI/UX Engineer / Software Engineer

For this I am completely responsible for UI/UX and I have created design of automation chatbot also I have created the dashboard design with separate components with React.js and Material UI.

I have worked with Google cloud api responses to coverup in Laravel APIs to send appropriate response in chatbot UI.

3) Home Services

Duration: Oct-2017 - Sep-2019

Technologies Used: ReactJs, Redux Store , PHP, Yii2, Scala, Kibana, GitLab, Google Cloud Platform, AWS S3 Bucket, Docker, Kubernetes

Description:

It is porch services project, which is part of porch.com, mainly this is for placing the order to porch.com for any services like Handyman, Landscaping, Plumber, Electrical, Painting and other home improvement work.

Homeowner can book any services with automation tool as per selected services. Like option will change as per selected services. Before this was called done.com but porch has takeover this project and launch this as Porch Services.

Roles & Responsibilities: UI/UX Engineer / Software Engineer

Before this project was in PHP YII framework and after takeover by porch we have moved all the things to React.JS. I was responsible to create React UI components with responsive ui. I have created all the components with Material UI framework also I was also responsible to connect the API with that component as well.

4) Home Inspection Services - ISN

Duration: Sep- 2019 - Sep- 2020

Technologies Used: ReactJs, ReactNative, Redux Store , PHP, GitHub, Docker, AWS EC2.

Description:

This is also port of Porch.com

ISN is providing the home inspection software, which is completely work with automation and give tools like signature capture, survey delivery, SMS and many more.

Roles & Responsibilities: UI/UX Engineer / Software Engineer

Project is in PHP and React.JS, I was responsible for updating replace old UI with new UI. Created new UI dashboard with updating new layout from Invision design to react component.
