<https://itunes.apple.com/us/app/myobits-obituary-listings/id1374305115?ls=1&mt=8>

6.GoBe!

Description

Whenever we encounter something, interesting and that we want to remember – be it a gem of a shop, a striking building, a great piece of street art, a view... – we make a mental note of it, perhaps take a photo. But often with time we simply forget the detail, and they become just another pic in our camera roll. This app is an easy way to note those things and

keep them accessible. You make a "tip" – a note with a bit of text, with pictures and maps as optional. And then you decide whether to keep the tip private, share it with friends, or make it public (and you can change your mind at any time).

BEAT THE “CURSE OF THE CONTINUOUS SCROLL”

GoBe! has got rid of the addictive component of many apps, where your latest post disappears downwards by the push of newer posts, creating a social anxiety that can never be fulfilled.

Here, your tips are always available with one tap to your phone: to remember the moment, easily find them with the geolocation, or to pass on to a friend.

A MORE AUTHENTIC, SAFER SOCIAL SPACE

We protect your social space by ensuring that you only connect as friends with people with whom you have shared interests - no more "friends" requests from random people.

And GoBe! shifts the emphasis away from the accumulation of likes and friends, and into the activities (the tips) themselves. How it works is that you make friends through the tips, rather than by the contacts on your phone. And because you primarily record things for yourself, you don't have that “tingling noise” at the back of your head about what others will think of your post – you decide how much, when and who to share it with. It is a slow social approach that leads to a more personal and authentic experience.

Key Features..

- Login/SignUp.
- Share post
- Go Search.
- Be Searching.
- Social integration.
