[monsenhor@cpan.org](mailto:monsenhor@cpan.org)

## Summary

DEVOPS ENGINEER

Monsenhor is proud to have a large experience dealing with the Free Software community, leading events, designing, sysadmin, coding, and managing innovative projects since 1996, enhancing governments, universities, and private companies. He did relevant work when leading the PSL-RJ project for the Brazilian Federal Government, creating events and courses about Linux and Free Software, inviting notorious persons like Richard Stallman, Jon Hall, and Eric S. Raymond, performing hundreds of talks, classes, and workshops, reaching more than 50 thousand individual participants and being known by millions in the community. In 2006 he created the IBPAS, putting 300 companies together supporting Free Software as an industry pattern in Brazil.
