EDUCATION

Brandeis University
Waltham, MA

B.S Computer Science
May 2015

SKILLS

Languages: Python, PHP, JavaScript, Java, SQL

Frameworks & Libraries: Node.js, Laravel, Wordpress, Grunt, Gulp

Tools and Software: Redis, docker, memecached, Heroku, MySQL, Unix, JIRA, Git, Bash

WORK EXPERIENCE

Software Developer, CommunityCo / Forbes Councils *June 2015 - present*

- Architected and developed from scratch the Editorial & Q&A systems for the CommunityCo and ForbesCouncils websites used by 2000+ community and members and organization editors regularly, using PHP, SQL, Wordpress, SCSS, and Grunt
- Built program to optimize software development team's testing workflow by automatically cloning selected Dynamo databases using AWS (Amazon Web Services) SDK, Bluebird.js library, and Node.js
- Maintain and add requested features to all 12 organization websites daily using WordPress, JavaScript, PHP, SCSS, and SQL
- Wrote authentication program for integration with Forbes application using PHP and JavaScript to facilitate member identification between different community websites
- Successfully developed in-house backup system for migrating third-party billing data, writing asynchronous database migrations with Knex and Node.js
