HSC	Shahid Syed Nazrul Islam College	Science	Dhaka	2012	5.00
SSC	Chandipasha Govt. High School	Science	Dhaka	2010	5.00

HIGHLIGHTS OF QUALIFICATIONS

- OOP concept.
- JavaScript for creating dynamic website.
- Database administration and user account management.
- PHP administration and user login management.
- HTML CSS for designing web pages.
- Wordpress for creating dynamic website.
- C# for creating Desktop application and asp.net.

KEY SKILLS

- Programming:** ASP.NET , PHP , C, C++, C#
- Scripting Language:** HTML, CSS , JavaScript, jQuery
- Database:** MySQL, SQL
- Framework:** Laravel , Bootstrap , MVC , Wordpress

Online Programming Platforms:

- LightOj** : Solved ~50 problems
- UVA** : Solved ~100 problems
- ≈300+ problems solved in different online judges.

PROJECTS

Super shop Management System:

An easy solution for inventory management of a super shop developed by C#. There one can input item by generating barcode and when selling a product delete it by reading barcode from the products body. Managers can view salesman's profile, add and delete salesman and also check daily, weekly and monthly sales report.

Ticket Booking System:

It's a real life project of a c ticket booking system developed by ASP.NET and mysql. Input ready to book ticket and then anyone will be able to use it by showing this token .User also can change the booking ticket.

IIT Attendance Management System:

IIT attendance management system is developed by PHP. It a real life project of IIT which will be able to count the attendance of the student in the class. So we can find out who will be present and who will be absent in the class by using this. We can also find out the whole month attendance for any student.

JU_Transport:

It's an android application which provides time schedule of transports for Jahangirnagar University by using Java Android platform.

E-commerce:

This project is represents a transaction of buying or selling online for men's wear, women's wear or electronics things which is developed by LARAVEL PHP framework and MYSQL. .Anyone can be able to buy any kinds of products which one he/she wants. Everyone also can be ordered any product by e-mail to this site.

FINAL YEAR PROJECT

Develop a color follower robot for industrial development and personal assistance:

This project presents an application to follow the path by following the color of a object with a camera. We have a robotic camera which picks different path to detect the middle point to the color of the object and moves around to follow this path. It describes the ideas and the design of the Color follower robot which will be able to do something by following the color.

Volunteer

- Kit Distribution and Management in **IEEE**

Professional Course
