Profile

Top performer who is self-driven and excels at new assignments. Disciplined and goal orientated with flexibility acquired through "adapt and overcome" approach instilled through military service. Ability to deliver maximum results with minimum supervision. Consistently high performance in tasks involving time management, organization, leadership, and ability to make sound decisions. Aptitude for projects involving abstract thinking and creative development. Seeking a position that challenges training and experience to the utmost while providing opportunities for continued growth and knowledge.

Experience

Web Developer (Contract) – Noble Capital Group / Acute Financial Contract – Austin, TX (August 17 – Present)

Given existing marketing plans and goals, developed a website for the Acute Financial brand of the Noble Capital Group. Assisted in designing UI/UX and creating wireframes, then developing the website on a WordPress CMS platform. While working in conjunction with the Marketing Manager and the CMO of the organization, I assisted in developing brand consistency across web resources of the brands under Noble Capital Group, established an event registration portal that integrates with existing web branding, and developed continuous integration, security, and workflow processes for the organization.
Utilizing: HTML, CSS, SCSS, Gulp, jQuery, PHP, Bootstrap, WordPress

Senior Software Engineer – Business Integra / Department of Labor Contract – Austin, TX (September 16 – June 17)

Designed operational flow system and developed processes for development of Department of Labor JobCorps website redesign project. Taught Drupal 8 development classes to the design and front-end development team, while acting as Lead of backend development team. Determined and configured modules to use, assigned developmental tasks to team members, and oversaw Drupal development process for a multi-site with over 130 sub-site instances. Development was performed on Drupal 8.
Utilizing: HTML, CSS, SCSS, Gulp, jQuery, PHP, Bootstrap, Drupal, TWIG

Drupal Developer/Project Manager/Consultant – Freelance/Contract – Austin, TX (April 12 – Present)

As both a start-to-finish developer, and as a member of various development teams,

utilized knowledge of Drupal, web development practices, and marketing standards to assist on project on an as-needed or ongoing basis for various companies. Clients have included predominantly development shops needing assistance with overflow work, or on specialized tasks requiring advanced knowledge of specific aspects of Drupal. Experienced with multiple work flows and development processes, and adaptive nature gained through rapid acclimation to multitude of roles within the development team.
Utilizing: HTML, CSS, SCSS, jQuery, PHP, Drupal

Drupal Developer – Keller Williams Realty International – Austin, TX (November 13 – January 15)

Operating as member of a web development team within the Marking and Communications department, and later within the Digital Information Design department, created and managed Keller Williams Realty International's online presence through the Drupal Content Management System (CMS). Projects included front-facing informative websites, e-commerce sites, as well as internal tools and management options. Used previous experience to affect planning and development of marketing strategies within the Keller Williams organization. Alongside system administrators, established standard operating protocol for development of all forward-facing websites. Designed and developed custom application scripts that automated processes within organization and increased overall efficiency.
Utilizing: HTML, CSS, SCSS, jQuery, PHP, Drupal

Web Developer – Hyde Interactive – San Angelo, TX (April 12 – April 13)

As a member of a web development team, functioned as both a front- and back-end developer using Drupal as a CMS. Excelled in front-end theming, using the latest advances in HTML5 and CSS3, while maintaining a strong working knowledge of back end development via Views, custom templates (tpl.php files), blocks, and context while utilizing jQuery, javascript, and php. Experience using git for version control, and drush for scripting interface via both MAMP and WAMP stacks. While working for larger agencies, amassed knowledge of AGILE workflow and scoring system. Advanced working knowledge of responsive theming, based on browser size via multi-level CSS. Received Bronze Addy award for recent project.
Utilizing: HTML, CSS, jQuery, PHP, Drupal

Owner/Designer - Lehigh Website Design - Easton, PA/Center Valley, PA (Jan 09 – Jun 12)

Met and corresponded with clients to determine their needs for their business websites. Used image generating software to include Adobe Photoshop in the design and layout of various web design projects. Comprehensive knowledge of HTML (XHTML 1.0 Strict, HTML5), CSS (CSS3), PHP, and MySQL used to program these websites within the guidelines of the World Wide Web Consortium (W3C).

Performed validation and testing of products to ensure cross-browser compatibility coupled with problem-free coding. Aided external web design companies and firms by assisting with overflow projects on a sub-contractual basis. Worked closely with other area web designers to provide maximum range of services to all local businesses. Previous clients include trades-persons, advising and placement companies, and political campaigns
Utilizing: HTML, CSS, jQuery

United States Marine Corps (Oct 07 – Oct 15)

Acted as part of the Aircraft Rescue Firefighter platoon in various arrays of firefighting, for both flight lines and structural purposes. Cross trained logistician in the Air Ground Support Operations Command. Served as the youngest and most junior ranking Marine chosen for a team that oversaw all operations of the Marine Wing Support Squadron at our base, Forward Operating Bases, and Forward Arming and Refueling Points under the unit's authority during deployment to Iraq for combat operation.
