

ALEJANDRO YARCE

Senior Full Stack Developer

Medellin, Colombia | +57-3108483746 | alejo.yarce990@gmail.com

Summary

I am a responsible, creative, timely and proactive person who loves to learn and appropriate the work that is being executed. I like to take on challenges and achieve the goals set with excellent quality.

I have experience leading and being collaborator with teams in the maturity of the processes or methodologies that can be presented to undertake specific areas.

I am very passionate about Javascript and implementing Open Source technologies. I think that the most effective learning is given by immersive projects where I'm being take on challenge and I have to take fast and approaching decisions as part of a team.

Work Experience

Senior Frontend Developer - Freelance 2017 - Present
Santex Group

I develop high level visual products with high Front End technologies making use of agile frameworks like scrum for the day to day and the entire project flow.

I'm also part of the requirements design process with the client and user experience focusing on meeting their expectations.

Projects:

- Atlas Platform - Ilumno
 - Angular
 - Node.js

Technologies and Skills:

- Angular (Version 2 and 4)
- Angular CLI
- Saa and CSS
- Product Development.
- Construction of the development architecture.
- Communication with the different stakeholders of the product in stages of analysis, design and development.

Co-Founder and Senior Full Stack Developer 2016 - Present
Vokzen

We transform ideas into immersive, useful and engaging experiences creating the most innovative products. We help businesses grow in different areas with technology and design across digital ecosystems.

I participated as a Product Owner and Full Stack Developer in different projects and functional definitions.

Projects:

- Design TV - DesignIt
