## Work experience

Senior Frontend Developer - Freelance

2017 - present

Santex

My participation focused on the development of products at a visual level with technologies such as front end. In the same way making use of agile frameworks as a scrum for the day to day of the project.

We also participated in processes to raise requirements and user experience with the client and consultants focused on this type of problem.

Technologies such as:

- Angular (Version 2 and 4)
- Angular CLI
- Saa and CSS
- Development of the product.
- Construction of the development architecture.
- Communication with the different stakeholders of the product in stages of analysis, design and development.

Co-Founder and Vue.js Developer

2016 - present

Vokzen

We transform ideas into immersive, useful and engaging experiences creating the most innovative products. We help businesses grow in different areas with technology and design across digital ecosystems.

He also participated as a product owner in the development of projects and functional definitions

I meet with knowledge in these areas:

- Scrum
- Planning
- Architecture construction

And development in:

He also participated as a product owner in the development of projects and functional definitions:

- Angular
- Ionic 3
- Vue.js
- Vuex
- React

## Who am I ?

I am a responsible person who loves to learn and appropriate the work that is being executed, in order to achieve the expected results and a final product with excellent quality. I have the same attitude of leading processes or being a collaborator in the maturity of the processes or methodologies that can be given to undertake in some area in specific.

In the implementation of technological development I am very close in Open Source technologies and passionate by the world of javascript and all its flavors.

I am very of the end of which the most effective learning occurs through immersion or self-taught processes giving as this a more appropriate result at the moment of approach certain areas of knowledge or specific technologies.

## Area of Expertise

Friendly

English

Project Leadership

Infrastructure

Community

Software development

UX/UI

- Redux
- Rest API
- GraphQL
- Patterns with Javascript.
- Prototype
- EMCS6 or Babel
- Webpack
- Node.js
