❖ Web Portals

1. Project Name: MeraProfessor

Languages/Web Technologies/Tools: PHP, JQuery, HTML, CSS, AJAX, Bootstrap, JavaScript
Database: MySQL

The project was a rating website where the students can rate a particular college or a professor . The basic idea of the project was to help students by giving the student a feedback about the college/professor.

2. Project Name : Taleho

Languages/Web Technologies/Tools: PHP, JQuery, HTML, CSS, AJAX, Bootstrap, JavaScript
Database: MySQL

Taleho is a social network for Real Estate. Taleho provides you that Social Platform where you can connect with your friends and family, stay connected, get indulged in reliable transactions and make buying/renting a smooth and convenient social experience. Every property on Taleho has 3 videos (Inside the house, Around the house & Towards the house.) that helps you in getting a clear

view of the property.

The social map helps you in finding your friends nearby. Taleho also specialise in online **Document making** technology services thus providing a platform that lets you make a real time agreement and simultaneously chat on terms and conditions with the seller.

3. **Project Name** : NMIMS Placement System

Languages/Web Technologies/Tools: PHP, JQuery, HTML, CSS, AJAX, Bootstrap, JavaScript
Database: MySQL

- a. MBA
- b. MBA (Tech.)
- c. B.Tech

The placement portal helps to automate the placement system for the Institute. The Admin creates companies and jobs and places the students once the student is placed in the company. The student registers on the portal, fills his basic information that is needed for resume creation and job eligibility, view and applies for the jobs that he is eligible for. A helper verifies the student's information and gives correction if needed.

4. **Project Name** : NMIMS Course Selection System

Languages/Web Technologies/Tools: PHP, JQuery, HTML, CSS, AJAX, Bootstrap, JavaScript
Database: MySQL

A course selection portal for 2nd year students of NMIMS(MBA). The students register their choices on the system, the system validates their selection based on the rules of the NMIMS college. The results are generated through a process, that considers the students selection and the set of rules given by the Institute. The allotment is triggered through the Admin Panel.

5. **Project Name:** Curitiz (Testing Phase)

Languages/Web Technologies/Tools: PHP, Codeigniter, JQuery, HTML, CSS, AJAX, Material Design UI, JavaScript
Database: MySQL

A US health care project, where end users can search for any medical treatment in their city or any other city. The result also provides user, with the standard cost of the procedure and reviews given by other users. The user can also provide feedback about the procedure conducted with the particular doctor or organization. The question module of the system will help the user to ask any health related queries which can be answered by any other user, if the answer seems to be satisfactory the user can close the question or else the question remains open for anyone to answer. Each city has its individual community page where the user can view top rated organizations or practitioner and most asked questions.

6. **Project Name:** Atlas Tours and Travels (Under Development)

Languages/Web Technologies/Tools: PHP, Codeigniter, JQuery, HTML, CSS, AJAX, Material Design UI, JavaScript
Database: MySQL

A web portal to book tickets and packages for anyone wishing to perform Umrah (Muslim Pilgrimage). The portal has three main roles, the Admin, the Agent, and the user. The admin

creates and manages packages and their inventories. Each package has multiple rooms with specific quantities. Admin has access to all the reports viz. the no of rooms occupied, the members of the group, Agent Wallet Details, etc. The admin also manages flight bookings via the portal. To book a package or flight ticket, the user or the agent has to first register themselves on the portal. The role of the agent is similar to that of the user i.e to book the packages. Apart from this the agent has a Wallet through which he can make payments for the booking. The admin has the access to credit the agent's wallet as and when needed. The user or agent can anytime cancel their booking.

❖ HTML Websites

1. Project Name: BFY Sports and Fitness

Languages/Web Technologies/Tools: HTML, CSS
Database: MySQL

Revamped the UI of the portal. A fitness portal, that gives you an international certification as a Fitness Trainer. It also provides jobs to its students.

2. Project Name: Jobs for Youth

Languages/Web Technologies/Tools: HTML, CSS
Database: MySQL

A html website for corporate presence. Jobs for Youth offers Jobs in the Gulf Countries.

3. Project Name: CYDI App

Languages/Web Technologies/Tools: HTML, CSS, Angular
Database: MySQL

The app is a hybrid application which uses basic HTML, material design UI and Angular JS. The task assigned to me was to complete the User Interface for the App using HTML and CSS.

FREELANCING PROJECT

❖ Maintenance Work

1. Project Name: Pakeezgi

Languages/Web Technologies/Tools: PHP, JQuery, AJAX, Bootstrap, HTML, CSS, JavaScript
Database: MySQL

It is a Muslim matrimonial website, that gives basic information about the registered candidate.
