Bachelor of Arts, cum laude
Southwestern University
1988-1991, Georgetown, TX

JOE WILSON
LEAD DEVELOPER, FULL STACK DEVELOPER

ABOUT ME

I have 25+ years of experience in software development. I've led successful projects with large organizations like the Air Force, AT&T, Jeffco Public Schools, Dell, 3M, JCPenny, and TXU, and I've done a lot of work with medium-sized companies as well. I'm used to fast paced coding, changing requirements, and high expectations. I can run the whole project, manage the development team, or just roll up my sleeves and be an individual contributor.

My latest favorite tools are C#, ASP.NET Core, JavaScript, webpack, VueJS, React, NUnit, and Jest. I've been using Azure DevOps, GitHub, Azure, Kanban Flow, and Slack to lead and manage development teams.

SUMMARY

- Professional software developer for 25+ years, including 20+ years consulting and 15+ years leading and managing development teams.
- Recruit and manage productive, technically strong, and high functioning development teams.
- Build bottom-up consensus on dev teams for coding, tool, and architecture decisions for full team buy-in. Inspire a sense of ownership on the dev team to ensure customer focus and successful delivery.
- Produce high quality, maintainable code developed at a sustainable, predictable pace.
- Excellent problem-solving skills and attention to detail.

WORK EXPERIENCE
