

Gaurav Kumar

Team Lead at Softuvo Solutions Private Limited

Summary

I am an app developer with a passion for all things mobile. My love of clean code and a smooth user experience pushes me to create apps with optimal performance. My experience at Populace Inc ,and Technocrats Horizons has allowed me to create applications and watch them instantly being used by my peers. This has given me incomparable insight into how users think and what they want out of an application. As a result I have greatly enhanced my insight into what my users want, before they even know it.

Specialties: iOS Apps, User Interface Design, Sql Database , AWS ,Firebase,Azure, Xcode Objective C,Swift
MAC Genius .

Experience
