ABDUL FARHAN VEERASSA

(Senior web developer)

I am a Sr. Web Developer with over 4.5 years' experience, in the design and development of innovative and dynamic website using current W3C standards of coding. I am so much dedicated to creating e-commerce, Dynamic, and Static with Responsive Websites. My area expertise is Magento, WordPress, PHP, HTML5/CSS3, Bootstrap 3 and 4, and Angular Woocommerce. I have an additional experience in the use of content management system to allow client update content on their websites and along with this the organizational, presentation and communication skills to help plan out and pitch different web user interface style that suits the client's needs. As a senior web developer, my responsibilities include leading a team of junior developers, refining website specifications and resolving technical issues. I have some kind of extends experience in building WebPages from scratch and in0depth knowledge of at least one of the following languages like JavaScript or PHP.
