

## Executive Summary:

We have an experience of over a decade in Web Design & Development with an expertise over platforms like WordPress, JAVA, PHP, HTML, CSS, JAVASCRIPT, jQuery, Magento, Shopify, .Net, Ruby on Rails, Mobile applications, etc.

We also match you with the most qualified developer for your project so you know that you are getting the highest quality work, for the best price available. Set your budget, and let's get to working together!

## Skills & Languages:

PHP, RoR, Haml, Git, .Net, Java (JUnit, Java Play, Spring, Hibernate, Guice, Wicket, Ant, JSP, Log4j), Javascript, C, C++, C#, Python, HTML5, Native iOS and Native Android, jquery, sencha, node.js, backbone.js, CSS 2.1/3, HTML, AJAX, JSON, REST, SOAP, Kendo UI, Dojo UI.

## Accumulative Engineer Experience:

- ❖ 12+ years Professional Services/External Consulting
- ❖ 12+ years Relational Databases & Tools: Oracle 8-10g, SQL Plus, SqlServer 2000 & 2005, PLSql, DB2, MySQL, HP Image/Image SQL, MongoDB
- ❖ 4yrs Microsoft Dynamics AX installations & configurations
- ❖ 5yrs of Salesforce.com implementation, administration, and cloud consulting, Apex and Visualforce (Salesforce.com proprietary languages)
- ❖ 4yrs Site Core and Digital Marketing
- ❖ 10+ years Visual Safe Source, MS Project, MS Office
- ❖ 10+ years Web Development: PHP, C#, C++ HTML, DHTML, CSS 2.1/3, VB.NET, PHP 4.0/5.3, Ajax, ASP, ASPX, Java JavaScript, XML, VBScript, Apache Struts, .NET, Ruby on Rails, Python
- ❖ 8+ years Visual Studio, Visio, Erwin, Ms Project, Flash, Action Scripts 3.0
- ❖ 8+ years Mobile Development: AppForge Mobile VB, Crossfire 5.0, Windows CE
- ❖ 8+ years with Big Data, Hadoop, machine learning algorithms, ETL processes
- ❖ 3+ years Google Ajax Loader, KML, GeoIPCoder, Yahoo UI Services, MVC, MS Dynamics AX
- ❖ 7+ years NAV, MS Sharepoint Development, Angular JS

## Field Experience:

- ❖ Develop frontward-facing websites as an individual and on teams using technologies including ASP.NET, JavaScript, XHTML, CSS, XML, SQL Server, and Sitecore CMS
- ❖ Provide front-end development consultation to team members
- ❖ Train new developers on common techniques and practices including design integrations (PSD to XHTML/CSS conversion) and version control (SVN)
- ❖ Research new web technologies and present findings to team members and/or the entire company.

## PHP:

- ❖ Created business intelligence dashboard with a visual graphing interface and numerous controls. Made a daily single report page which contained 30,000 different graphs.

- ❖ Developed project plan and implemented a new strategy for an affiliate referral process. Created the PHP & VB .NET components and managed various departments to implement the project.
- ❖ Magneto Enterprise implementation and customization experience.
- ❖ Drupal, Joomla, Wordpress, other ecommerce platforms
- ❖ Created reporting websites for poker affiliates, rakeback players, poker props, prop admins and skins.
- ❖ Provided security assessment of existing data retrieval system. Implemented simple security fixes and provided a report on longer term issues.
- ❖ Created a decoupled deployable system that manages operating system updates & IP/
- ❖ Device assignments for a handheld computer device operating over WinMAX wireless technology.
- ❖ Created two RESTful servers, a public server that handles incoming communication from a handheld device and a private RESTful server that manages data packages and handles configuration management.
- ❖ Created thin PHP 5 layer on top of PostgreSQL database and build a command line interface for basic database functionality.
- ❖ Build a Web Console in PHP 5 and JQuery that connected to a RESTful server using
- ❖ JSON as the datatype exchange language.
- ❖ Created application architecture and API documentation created in MediaWIKI.
- ❖ Created a decoupled deployable system that manages operating system updates & IP/
- ❖ Device assignments for a handheld computer device operating over WinMAX wireless technology.
- ❖ Created two RESTful servers, a public server that handles incoming communication from a handheld device and a private RESTful server that manages data packages and handles configuration management.

## Java:

- ❖ JavaSE, JavaEE (Servlets, JSP, JDBC, EJB, JPA, JTA). Understanding of principles, programming patterns (MVC, Singleton, Proxy, Observer, DAO, Factory).
- ❖ Basic knowledge of Spring and Hibernate.
- ❖ Web frameworks: Ruby on Rails.
- ❖ Databases: Oracle, SQLite, MySQL
- ❖ Web servers: BEA Weblogic, Apache TomCat,
- ❖ Web technologies : HTML, XML, CSS, JavaScript
- ❖ Development process: Jira
- ❖ Version control: Git, IBM ClearCase, SVN
- ❖ Data exchange: XML, JSON
- ❖ IDEs: Eclipse
- ❖ Excellent communication skills.
- ❖ Architected, designed, and lead development of the MEC2 Integration Project for childcare assistance. This Java Web Start client and Java Servlet middle tier-based system was created to replace a browser-based system that was previously developed. This system is used by both county and state workers in Minnesota to determine eligibility for child care assistance, fight fraud by both families seeking assistance and by childcare providers, and to streamline the process from initial family application through provider payment.  
The architecture consists of a Swing-based Java Web Start (JNLP) client that serializes objects over an HTTPS connection to a Java Servlet middle tier. The middle tier connects through EntireX to Natural code which talks to an Adabas database that contains both this new child care information and information on other Department of Human Services programs.
- ❖ Trained 40 state employees who where mainframe programmers with no Java or object-oriented experience. These employees were trained in Java, UML, JDBC, XML, Servlets and JSP's, and Java Web Start part-time during normal business hours over

several months. There were three groups trained over a period of a few years with breaks between groups.

- ❖ Mentored the newly trained state employees in Java as they developed the new child care assistance application.
- ❖ Encouraged the use of open-source tools to save the taxpayers' money, including the use of Eclipse, Ant, Tomcat, Linux, CVS, and Subversion.
- ❖ Continued to support a small team of state employees who were maintaining the old, browser-based (JSP, Struts, WebLogic, Microsoft SQL Server) child care assistance application while the replacement application was being developed.
- ❖ Used Java EE and Java SE technologies: JNLP, Java Web Start, Swing, Object Serialization, XML, Java Servlets; ProgramixGenericLib toolkit; UML diagrams for design; Eclipse 3.0, 3.1, and 3.2 for editing; CVS, WinCVS, SmartCVS, CVSNT, and Subversion for version control; and Ant for builds.

### **.Net:**

- ❖ Created web-services(API) and some back-office data grids(CRUD) using Asp.NET 4.0
- ❖ Web API, C# MVC3, EF 5, KnockoutJS, Telerik KendoUI, MS SQL Server 2008, Visual Studio 2012
- ❖ Creating an e-commerce API. RESTful web services hosted by Windows Azure cloud service using ASP.NET Web API and MVC
- ❖ Ported some existing web framework written in VB to C#. Created some SQL objects(Views/Stored procedures/tables etc) and . Also fixed some bugs in the existing database related to reports and data integrity.
- ❖ Created RESTful web services. Implemented interfaces. Worked with Business Analysts to get the specifications.
- ❖ Mainly worked with Asp.Net 3.5 VB and Sql Server 2005
- ❖ Developing a shopping system, worked on a few e-commerce websites: handbagsandperfumes.com - fizi.com, continentalmobiles.com, biddi.com - team of 2-3 dev. winafreeappleipad.com
- ❖ Used Asp.Net 3.5 C#, SQL Server 2005/2008, JQuery, Web Service

### **Work Samples:**

#### **Corporate / Business Websites (Wordpress Based):-**
