Praduman Mali

OBJECTIVE

Seeking a position to utilize my skills and abilities which would enable me to grow while fulfilling organizational goals that offer professional growth while being resourceful, innovative, and flexible.

CAREER SUMMARY

- ✓ 5+ years of Information Technology (IT) experience in the field of software testing in manual and automation testing of web based and client server applications.
- ✓ Techniques involving all the phases of Software Testing Life Cycle (STLC).
- ✓ Testing experience includes requirement Analysis, writing, reviewing and execution of test cases, Test Scenarios, bug logging using JIRA.
- ✓ Experience in working Agile methodologies.
- ✓ Knowledge on web application testing using selenium web driver with TestNG framework.
- ✓ Experience in performing manual testing, functional testing, smoke, retesting, regression testing.
- ✓ Excellent interpersonal, communication and organizational skills with proven abilities to work independently and as part of team.
- ✓ Sound knowledge on Manual Testing, Automation Testing (Selenium Web Driver), Web Application Testing, Database Testing, MAVEN, TestNG and SQL.
- ✓ Extensive working experience on all phases of Software Development Life Cycle (SDLC), its methodologies such as Agile and SCRUM - process.
- ✓ Extensive experience of Software Testing Life Cycle (STLC) in implementing QA Methodologies.
- ✓ Expertise in developing Java Selenium WebDriver test scripts and Test Framework using TestNG.
- ✓ Extensive experience in reviewing and analyzing Business Requirements and creating Test Cases, Test Scripts, Test Estimation & Requirement Traceability Matrix (RTM).
- ✓ Professional expertise in Smoke Testing, backed end Testing, Black-Box Testing, User Acceptance Testing (UAT), Functional Testing, Positive/ Negative Testing, System Testing, Regression Testing, GUI Software Testing, Ad-hoc Testing, Cross Browser/ Cross Platform Testing, UI Validation, Web Services, Performance Testing, Usability Testing, Boundary Value Testing (BVT).
- ✓ Sound knowledge on Object Oriented Programming (OOP) concept. Extensively used Java for test case automation.
- ✓ Comfortable in Joins, Sub-queries, Grouping.
- ✓ Good communication skills, quick learning and multi-tasking abilities, experience of working with team members from different cultures.

TECHNICAL SKILLS

Testing Tools	Selenium Web Driver, Sikuli, Java robot
Languages	Core JAVA
Development Life Cycles	SDLC, STLC, Bug life cycle
Test Framework	TestNG, Data Driven Framework
Web Debugging Tool	XPath, Firepath, Firebug
Build Tool	Maven
Processes	Agile-Scrum, waterfall model
Operating Systems	Windows (XP, 7 & 10), Unix
Bug Reporting tool	Mantis, Jira

CAREER SNAPSHOT

Profile	Company Name	Tenure
Sr. Software Tester	Alcyone Technologies pvt.Ltd.	Aug 2016 – Present

QUALIFICATION

Degree	Institute
MCA	Shri Vaishnav Institute of Technology & Science, RGPV University, Bhopal (M.P), India
B.C.A	M.B. Khalsa College, DAVV University, Indore (M.P), India
SSCE	Kasera Bazar Vidya Niketan H.S, Indore (M.P), India

PROFESSIONAL EXPERIENCE

Project # 1	
Project Title	Club Planner
Domain	Fitness & Health Care
Tools	TestLodge, Selenium
Project Overview	Club Planner is All-in-one Solution to manage your accesses, subscriptions, course cards. Plan your group lessons, arrange your sales, direct debits, invoicing, check your customers, plan their packages, book your sales, domicuring and invoicing care. The Club Planner All-in-one Solution is available on All the platform like Window Desktop (ClubPlanner.exe) + My Club Planner WebApp + My Club App (Xamarin App).
	• Developing test scripts using selenium with Java • Working on POM with TestNG framework

Roles and Responsibilities	- Preparing test plan, test cases and executing the test cases - Find bugs and logging, tracking, and retesting them in defect tracking system - Participating in client communications for technical needs and providing Testing status every day in standup. - Developed and maintained Requirement Traceability Matrix (RTM)

Project # 2	
Project Title	Navas Labs - Residents
Domain	Construction or Real Estate
Tools	Watir, Test Studio
Project Overview	It allows residents to submit work order requests for maintenance. Residents can attach images and provide description with the requests. Settings allow user to customize the app and avoid duplication of effort. Navas Labs, indicated that the app's privacy practices may include handling of data. It also has an added feature of remove selected images from the gallery An added feature of the quick work order, Integration with Rent Manager
Roles and Responsibilities	- Preparing test plan, test cases and executing the test cases - Find bugs and logging, tracking, and retesting them in defect tracking system - Participating in client communications for technical needs and providing Testing status every day in standup. - Developed and maintained Requirement Traceability Matrix (RTM). - professional experience in IT industry on Cross Platform (Web & Client-Server). - WEB, APP AND API automation. - Expertise in using Agile Software development methodologies like Scrum and Sprint. - Self-motivated and ability to handle multiple priorities with excellent time management skills and ability to work effectively both as an individual and as part of a team.

	• Review functional and design specifications to ensure full understanding of individual deliverables.

| Project # 3	
Project Title	PREMIOS GARDEL
Domain	Music or Event
Tools	TestPartner, Capybara
Project Overview	The Gardel Awards are 20 years old and we want to celebrate it with everything! Find out about all the news of your favorite artists, have fun with our augmented reality simulator, participate by tickets to the event, choose the song that for you represents the best of Argentine music.
Roles and Responsibilities	• Identify test requirements from specifications, map test case requirements and design test coverage plan • Develop, document, and maintain functional test cases and other test artifacts like the test data, data validation, harness scripts and automation scripts • Created and Verified Web Services API requests. • Hold and facilitate test plan/case reviews with cross-functional team members • Involved in creating Test Environment for Web Services Testing • Active participation in reviews and status meetings • Able to find issues using system/server/sql logs

Project # 4	
Project Title	Mawady e-Commerce
Domain	Ecommerce Application
Tools	Appium, Katalon
Project Overview	Mawady is online app for selling and buying hardware. It has two part of an application. One is User/Customer and second is admin or control panel. Customer can create an account and it can be ordered some product and it can check the order history, cancel order, return order, or track order status. Admin has contain with Dashboard, Catalog like Category, product, product attribute etc. Admin can be managed customer, vendor, manufacture, Configuration, multiple language support, Sales like order, shipping, recurring payment etc.

Roles and Responsibilities	- Project requirement analysis & Test plan preparation. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Manage demo and training on various functionalities of application to new team on requirement. - Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Creating Documents for all the modules (login areas) of Project. - Design and developing of wire frames (co-ordination with respective designer).

Project # 5	
Project Title	ByMe(Buy for Me)
Domain	Ecommerce Application
Tools	Selenium, Appium, Katalon Studio, Cucumber, Silk Test
Project Overview	ByMe App allows customer to buy any product from application. Customer can search product using category and add to card and go to the payment option. Customer can create an account with shopping offers and comes to feature products. It has major divided into 3 domains like Buyer, Seller, and Admin. Buyers can be buy the product and checkout process of product. Seller can create an account individual and enterprise wise and add product with respect to shop. Admin can manage both seller and buyer like approve and reject product, offer product and things.
Roles and Responsibilities	- Involved in Requirement gathering. - System and regression testing on various releases for new or existing functionalities. - Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution.

	• Exploratory testing when requirement is not sufficient from client. • Project requirement analysis & Test plan preparation. • Collaboration with development and business groups to conduct comprehensive testing on major releases.

Project # 6	
Project Title	AGR(Audit Graduate Recruitment Application)
Domain	Finance
Tools	Appium, Katalona
Project Overview	Deloitte Audit Graduate Recruitment (AGR) app is a division within Deloitte which focuses on the identification, recruitment and training of graduates, termed Audit Graduates, who are studying towards obtaining a Chartered Accountant qualification, CA(SA). AGR users to recruit Audit Graduates, track performance and manage graduates from the time they apply for the programmed to the time they complete a training course/degree. Deloitte looked to Entelect to provide an automation and workflow system to facilitate and optimize this process. Entelect was involved in providing the initial detailed specification for the project and thereafter developed and implemented the specified solution.
Roles and Responsibilities	• Project requirement analysis & Test plan preparation. • Collaboration with development and business groups to conduct comprehensive testing on major releases. • Creating effective test scenarios for all the functionalities at required testing phase. • Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. • System and regression testing on various releases for new or existing functionalities. • Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution. • Manage demo and training on various functionalities of application to new team on requirement.

	• Ensure timely and high-quality release of website and designing of test plans and test cases.
