EDUCATIONAL QUALIFICATION

2012: B.E. (Computer Science) from RGTU, Bhopal.
2008: Higher Secondary from secondary education Madhya Pradesh, Bhopal.
2006: Matriculation from secondary education Madhya Pradesh, Bhopal.

TECHNICAL SKILLS

Testing Tools	Selenium Web Driver, Sikuli, Java robot
Languages	Core JAVA
Development Life Cycles	SDLC, STLC, Bug life cycle
Test Framework	TestNG, Data Driven Framework
Web Debugging Tool	XPath, Firepath, Firebug
Build Tool	Maven
Processes	Agile-Scrum, waterfall model
Operating Systems	Windows (XP, 7 & 10), Unix
Bug Reporting tool	Mantis, Jira
Data Base	MS Access, MySQL

PROFESIONAL EXPERIENCE

Roles	Organization	Tenure
Software Tester	Freelancer	Dec 2020 -Till Date
Senior Quality Analyst	Alcyone Technologies Pvt. Ltd	Oct. 2016 -Nov 2020
Quality Analyst	Siya Technologies Pvt. Ltd.	Sep 2014 -Aug 2016
Quality Analyst	Impetus	Dec 2012 -Aug 2014

PROJECT DETAILS

Project 1

Project Title	Club Planner
Client Location	Belgium
Tools	TestLodge, Zephyr, TestLink, Souce Labs
Description	Club Planner is All-in-one Solution to manage your accesses, subscriptions, course cards. Plan your group lessons, arrange your sales, direct debits, invoicing, check your customers, plan their packages, book your sales, domicuring and invoicing care. The Club Planner All-in-one Solution is available on All the platform like Window Desktop (ClubPlanner.exe) + My Club Planner WebApp + My Club App (Xamarin App).
Highlights	- Project requirement analysis & Test plan preparation. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Manage demo and training on various functionalities of application to new team on requirement. - Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Creating Documents for all the modules (login areas) of Project. - Design and developing of wire frames (co-ordination with respective designer).

Project 2

Project Title	McKesson Document Manager & Homepages
Client Location	US
Tools	Selenium, Appium, Katalon Studio, Cucumber, Silk Test
Description	Home health software solution includes clinical management and business tools for home health documentation, collaboration across the care spectrum and clinical decision-making at the point of care.
Highlights	- System and regression testing on various releases for new or existing functionalities. - Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution. - Exploratory testing when requirement is not sufficient from client. - Project requirement analysis & Test plan preparation. - Collaboration with development and business groups to conduct comprehensive testing on major releases.

Project 3

Project Title	Eat Feast
Client Location	Australia
Tools	Appium, Katalon

Description	Eat Feast is an Web and Mvvm Cross Xamarin application that serves food to all over the Toronto city in Canada. It's a complete Ecommerce Application that contain following modules like Menu, Cart System, Order management etc.
Highlights	- Project requirement analysis & Test plan preparation. - Collaboration with development and business groups to conduct comprehensive testing on major releases. - Creating effective test scenarios for all the functionalities at required testing phase. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - System and regression testing on various releases for new or existing functionalities. - Manage client communication for all type of functionality related issues and convey it to respective team to give quick and reliable resolution. - Manage demo and training on various functionalities of application to new team on requirement. - Ensure timely and high-quality release of website and designing of test plans and test cases.

Project 4

Project Title	Resource Management System Boeing
Client Location	US
Tools	TestLodge, Selenium
Description	Convert an existing oracle forms application to Asp.net Dev express Website. It has five major section Platform Configuration, Application Configuration, Hardware Configuration, Client Server Architecture & Admin Section.
Highlights	- Manage demo and training on various functionalities of application to new team on requirement. - Ensure timely and high-quality release of website and designing of test plans and test cases. - Functional, UI and API testing of web/mobile applications along with Identifying, documenting, and reporting bugs & real-time customer issues within proprietary Web Based Application developed for leading Bank. - Collaboration with various development teams to help in reproducing & resolving bugs/issues. - Exploratory testing when requirement is not sufficient from client. - Responsible for regression testing on new releases or bug fixes, forming, and raising bugs and monitor bug life- cycle.

Project 5

Project Title	My4CRM
Client Location	Denmark
Tools	Watir, Test Studio

Description	4CRM is a Product and Service, it helps to manage everything in business, all in one place. Contacts, pipeline, opportunities, tasks, quotes, invoices, customer insight, business performance and many more. It has two parts of an application. One is User/Customer and second is admin or control panel.
Highlights	- Project requirement analysis & Test plan preparation. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Manage demo and training on various functionalities of application to new team on requirement. - Manage client communication for all type of functionality related issues and convey it to respective team in order to give quick and reliable resolution. - Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Creating Documents for all the modules (login areas) of Project. - Design and developing of wire frames (co-ordination with respective designer). - Creating and Maintaining Deliverables and Milestones of the Project. - Manage Demo and training to the Clients on all the functionalities of application. - System and regression testing on various releases for new or existing functionalities.

Project 6

Project Title	ATM Seguros
Client Location	Argentina
Duration	18 Months
Tools	TestPartner, Capybara
Description	The main object of ATM Seguros is to manage the details of customer, Insurance, Vehicle, Vehicle Type, etc. It deals with monitoring the information and transactions of vehicle type. This system is useful to manage the insurance details, to sanction the insurance for customer, process the insurance policy details and all kind of insurance process through online. It also helpful for tracking the details of the insurance policy, customer details and company details.
Highlights	- Design and develop efficient test cases for various scenarios & Maintain bug report based on test execution. - Creating Documents for all the modules (login areas) of Project. - Design and developing of wire frames (co-ordination with respective designer). - Creating and Maintaining Deliverables and Milestones of the Project. - Manage Demo and training to the Clients on all the functionalities of application. - System and regression testing on various releases for new or existing functionalities. - Manage client communication for all type of functionality related issues and convey it to respective team in order to give quick and reliable resolution. - Exploratory testing when requirement is not sufficient from client.

	• Exploratory testing when requirement is not sufficient from client.

DECLARATIONS

I hereby affirm that all the information furnished above is true to the best of my Knowledge Place.
