6. **Sharma Infoway Ahmedabad** from 11-Feb-2008 to 19-May-2010

Following are the major project on which I have been worked.

a) CRM – DrawFast.

Drawfast is CRM system where user will create quote for customer with customer login and when quote is created it will be send to customer to their mention email id, Once customer login they will login on to the system and they get the option “accept”, “too expensive”, “comment”, and “Reject”. Based on customer selection user will proceed ahead, Here if customer have accepted the quote user will have responsibility to create job for that quote and get approval from customer once jobs is done.

Once user get approval about the job that job is done, than system will automatic trigger the invoice to customers.

User name: hemant.yadav, password: 1234567

c) TRD

TRD is demolition management CRM System, In this user will add customer, create estimation for their building for demolition. Once customer approved it system will show all customer with progress of their job, In this user will create and manage RFP, Request for payment and shows full report of the system.

Tools & Technologies: Visual Studio 2015, Asp.net MVC 5, C#.net, SQL Server 2012, Entity Framework, Devexpress Control MVC, DEvexpress Reports

Site: [http://trd. qualitysofttech.com/](http://trd.qualitysofttech.com/)

User name: demo, password: demo123

d) Agriculture Commodity Exchanges:

The Agricultural Commodity Exchange (ACE) is a spot and forward market commodity exchange, meaning that all contracts require a physical delivery of commodities either immediately. On ACE it is up to the buyer and seller to agree which quality specification to use and to specify these in the contract. ACE has Warehouse Receipt System, ACE Bid Volume Only (BVO) and Offer Volume Only (OVO) systems and Bid and Offer Matching system. This is huge system.

Tools & Technologies: Visual Studio 2012, C#.net, SQL Server 2012, JQuery, Ajax, Umbraco Framework.

e) Transparency Portal (Bharat Petroleum Corporation Ltd (BPCL))

This is portal application to manage the Bharat petroleum Lpg gas subscription. In this portal

distributor subscribed the new user and based on region they have to pay the subscription amount. As per new government rule few state having less subscription amount and rest of all state have to pay full subscription cost. Using this portal admin can see how many refills users have booked and how many of them are subsidized and non-subsidized cylinder.

Tools & Technologies: Visual Studio 2010, C#.net, SQL Server 2008, JQuery

f) BRM – (Business Requirement Management) (Bharat Petroleum Corporation Ltd (BPCL))

This is portal application which is all about to manage the software development request coming into different department of Bharat Petroleum. In which department need to upload document that document will send to next level approval once all the approval has been done that development request will be forwarded to development team for development.

Tools & Technologies: Visual Studio 2010, Asp.net MVC 3, C#.net, SQL Server 2008, Ajax, JQuery control

g) Mobile web site CMS:

This is a web based CMS application. Where agency will have rights to create the site, pages of site and management of site, and client will able to see the analytics of their websites like from which devices site has been access it means all the traffic and from where and from which device the traffic is coming.

Tools & Technologies: Visual Studio 2010, C#.net, SQL Server 2005, Ajax, Cute Editor, JQuery control

h) Dating & Events

New York City's leader in speed dating and singles parties, dating is the preferred choice of professional men and women seeking love and friendship. Events have become the most successful and talked-about speed dating and singles parties in town! Customers are usually professional, busy men and women who live in the NY area, including the 5 boroughs and Long Island, Westchester, and many parts of New Jersey. Events offer an ingenious way for single men and women to meet each other. We bring them together in one place to meet, mingle, and see if there are matches between them. The result is a completely energetic and fun-filled event where strangers can become fast friends and more. We have established a great relationship with many of today's most popular venues, allowing us to provide our customers with safe and comfortable environments to meet and have fun.

Tools & Technologies: Visual Studio 2005, C#.net, SQL Server 2005, Ajax, AjaxHTML Editor, JQuery
