

Experience: 14 Years

Studio Z Architecture, Richmond, VA
June 2005 – Present: Project Designer.
Donelle applies her training, skills, and keen eye for detail to serve the needs of her customers. She creates design solutions for residential, retail and commercial spaces using Autodesk Revit® Architecture Building Information Modeling (BIM) software, allowing the project to be viewed and optimized in three dimensions. She is involved with every phase of the design process from initial client presentations, surveying existing sites, creating conceptual 3D models and generating detailed design and construction documents.

Studio Z Architecture, Richmond, VA
