Work Experience

Mango Software Lab as Project Lead & iOS Architect

Period: 1 Aug'23 to present (1 years 1 months)

Period: Sept'14 to Jan'21 (6 years 4 months)

- Mango Software Lab is a startup founded by me. I got a chance to work in a lot of small and medium projects mostly related to Mobile app development. I have a 5 star rating and a 100% completion rate at these freelancing portals from where I get the project. I also have a small team of part-time Android developers and I got a chance to manage small, medium size projects.
- The key projects that I have worked on are:
 - * EPC / Allpay.no, a Norway project, where I integrated a gaming console (vending machine) with Apple Pay using QR code.
 - * Huristic App for Huristic Cloud Services, which is based on AWS IoT.
 - * DealOut app for Greece client, which is similar to Zomato. (Was showcased in Greece newspapers and TV news. Had more than 10,000 downloads). I wrote my own algorithm using haversine formula.
 - * Heraf App for Middle East client wherein you can order services like electrician, plumber, etc. The app has separate login for providers and customers.
 - * Flirty App for UK client. A dating app which has features similar to Snapchat & Tinder. The photo or video needs to be uploaded Live.

Entire Software / Xeople as Associate Application Lead (iOS Project Lead & Architect)

Period: 2 Jan'23 to 31 July'23 (0 years 7 months)

- Entire Software is a product based Australian company having their office in Noida. They have a B2B SaaS application for HR Recruiting and Complete Staffing Solution and mobile application. They are the leading casual staffing software in Australia.
- My role is to develop the architecture of their new upcoming product with upgraded and modern AI features under the Xeople brand.
- Migrating existing codebase written in Objective C to Swift and SwiftUI.

Coforge as Technical Analyst (iOS Project Lead)

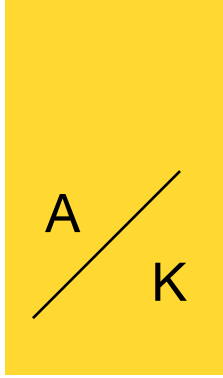

Period: 1 July'22 to 30 Dec 22 (0 years 6 months)

- On HSBC Project for a short period later the project was revoked.

DeskFactors Inc. as a Senior Software Engineer (iOS Lead & Architect)

Period: Jan'21 to 30 June'22 (1 years 6 months)

- Desk Factors Inc., is a Bangalore based startup firm. We are working on a B2B product i.e BlueSecures, which is an official secured communication app. I am the Lead Developer for iOS.
- My role is to manage my iOS Team and as well as writing code in Swift language. I got a chance to work on complex Encryption code, A/V calls and messaging.

Work Experience

Gobazaar as a Web Developer and a founder

Period: Sept'11 to Sept'14 (3 years)

- Gobazaar is an e-commerce firm founded by me, Maverick marketing later acquired this firm from me. Gobazaar was a multi-vendor e-commerce platform where sellers can sell their products.
- I got a chance to develop CCAvenue payment module for Prestashop version 1.4+. I developed an accounting software MANGO EASO for e-commerce sellers.

Polaris Software labs as a System Engg on Scotia implementation

Period: Nov'10 to Aug'11 (0 years 11 months)

- Intellect Custody is an open architecture software developed by Polaris Software Labs providing technology solutions to custodians giving them cross-border operations. The system provides the ability to define Master Account, Sub Account relationships and each service types, billing charges, reporting schedules and SWIFT message addresses at the individual account level. The product Intellect Custody has been implemented for many banks and is currently being implemented for Scotia bank, Peru. As a System Engg, I have to resolve the Change Request, Problem Request based on the backend technologies i.e Unix, Pro*C, Oracle and frontend jsp's.

CMC Limited as a System Integration on CDBL project

Period: April'10 to Nov'10 (0 years 7 months)

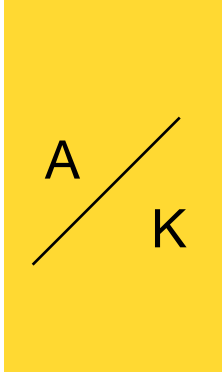

VeDAS or Versatile Depository Accounting System is a software developed by CMC Ltd. for its client CDBL (Central Depository Bangladesh Limited) which provides the facility of holding the securities/shares in an electronic form. Dematerialisation, Rematerialisation, settlement of trades are the basic functions of VEDAS.

As a SI (System Integrator), I have to resolve the Change Request, Problem Request based on the backend technologies i.e Unix, Pro*C, Shell Scripting, Oracle.

Almighty Software Solutions Inc., Bhopal as a Web Designer

Period: July'09 to Nov'09 (0 years 4 months)

- Designing and development of websites of local clients which included development of aesthetic front end design using Adobe Dreamweaver and Adobe Flash.
- Providing the functionality of forms and database using PHP and MySQL.
