Clients Feedback

- Noman has been working on the development of a MERN based webapp. He has continuously worked with us to develop requirements and develop the product to our specifications. At each step he has thought about how multiple stakeholders might use the app and as a consequence identified new functionality that would improve the experience. Most recently this included a well designed admin dashboard with usage metrics of the app. Noman clearly communicates and is available for meetings despite being in a different timezone. I would thoroughly recommend working with Noman in the future! *(check client feedback here https://www.fiverr.com/share/EP52Re)*
- The developer has great command of react, node js, express and mongodb as well as deployment. Would recommend him to people who are looking for a MERN developer. *(check client feedback here https://www.fiverr.com/share/EP52Re)*
