Work History

Full Stack developer Freelancer November 2013 - Present 9 yrs 3 mos

- Develop front-end, back-end website
- Develop plugins for open-source CMS
- Skills: PHP, mysql, html, jsp, css, jquery, javascript, codeigniter, laravel, node.js, wordpress, oclass,phpfox, invisioncommunity, Java, c/c++, xenforo, ubuntu, shell script, apache, nginx, firebase, swagger, nodejs, socket.io..

List of some my projects

https://longng.ddns.net/

Work on many websites for many clients

My Contributions:

- Develop new features/module/plugin/theme, maintain, fix bugs, deploy,... by myself

Skills: Laravel, MySQL, CodeIgniter, WordPress, HTML, jQuery, SQL, SSH, NGINX, Apache, CSS, Git, JavaScript, Node.js, Firebase, Web Development, Google API, PHP, AngularJS, E-Commerce

Project is running and client have income.

- HTML
- jQuery
- PHP
- MySQL
- JavaScript
- CSS
- Git
- CodeIgniter
- WordPress

- Web Development
- Laravel
- Firebase
- SSH
- NGINX
- Node.js
- SQL
- Google API
- Apache

- PHP/MySQL
- PHP, Laravel
- AngularJS
- E-Commerce

Cardshare

https://cardshare.cc

Develop an e-commerce web

My Contributions:

- I am only full-stack developer here. My work is transform website from CodeIgniter framework to Laravel framework

- Design new database and write script to move data from old database to new database

- Move page/features from old website to new website. I also do update to optimize functions if it is needed

- Main features is sell subscriptions for product, renew, extend subscriptions. I also integrated many payment gateway as Paypal, Stripe, Interkasa,... (about 10+ payment gateway)

Skills: Laravel, PHP, MySQL, HTML, CSS, jQuery, JavaScript, SSH, NGINX, Payment Gateway

Client happy and there are thousands of uses using this project

- CodeIgniter
- CSS
- MySQL
- NGINX
- SSH
- JavaScript
- PHP
- jQuery
- E-Commerce

- Laravel
- HTML
- PHP, Laravel
- PHP/MySQL
- Stripe

Books

A websites contain books

Skills: PHP, Laravel, MySQL, HTML, CSS, JavaScript, jQuery

Thousands of user are using it

- JavaScript
- CSS
- MySQL
- PHP
- jQuery
- Laravel
- HTML
- PHP/MySQL
- PHP, Laravel

Property websites

We have built a websites for property. User/Agency will post their property for rent or sale.

Website can show listings in 3 types: List, Pic and Map. In that, Map will load google map and show listings as Markers on map. We also support search listings by selected circle in map.

We also allow user to create schedule to post listings to their face book in groups, pages or timeline. This is auto function, user only set up schedule and a cronjob will do that for them.

We also allow user to pull and post listings from popular property websites as iproperty, propertyguru, mudah,.. This will be implemented by using Selenium. Users need have account at the website that they want to post or pull. Users also can set schedule to do post or pull.

My Contributions:

I do all works from develop new features, maintain, fix bugs, deploy,.. on this project.

Skills: PHP, MySQL, HTML, CSS, Bootstrap, Facebook API, Selenium WebDriver, Google API, Firebase, Git,..

There are thousands of users used this website and they are happy with it

- Firebase
- Facebook API
- Selenium WebDriver
- Bootstrap
- Google API
- Selenium
- CSS
- MySQL

- PHP
- HTML
- PHP/MySQL
- Git

Property with social network website

We have built a websites for property with social network. User/Agency will post their property for rent or sale.

My Contributions:

I do all works from develop new features, maintain, fix bugs, deploy,.. on this project.

Skills: PHP, MySQL, HTML, CSS, JavaScript, jQuery, Google API, Facebook API, Firebase, Git,..

This project is temporarily paused

- JavaScript
- CSS
- MySQL
- Firebase
- PHP
- jQuery
- Facebook API
- HTML
- PHP/MySQL

- Google API
- Git

Ong Heo

https://ongheo.vn/

A project that allow user to create money pot.

My Contributions:

- Implement create/edit/delete/search "money pot" use AngularJS, jQuery, HTML, CSS, JavaScript

- Implement comment module use AngularJS, jQuery, HTML, CSS, JavaScript

- Integrate Paypal payment use AngularJS, Paypal SDK, jQuery, HTML, CSS, JavaScript

- Use azure to update tasks status

Skills: AngularJS, JavaScript, HTML, CSS, jQuery, Azure

Project is running

- JavaScript
- CSS
- jQuery
- HTML
- Azure
- AngularJS

Senior PHP Developer GKXIM December 2012 - November 2013 11 mos

- Develop front-end, back-end websites

- Develop plugins for open-source CMS

- Develop web application use angularjs

Skills: PHP,mysql,html,css,jquery,javascript,wordpress,osclass,agularjs,..

Websites

Projects:

Skills: Java, Spring, JSP, JavaScript, MySQL, SSH, Hibernate, FFmpeg, SQL, PHP

Project work in several years, sell content to thousand of users

- SQL
- MySQL
- Hibernate
- SSH
- FFmpeg
- JSP
- Java
- JavaScript
- PHP
- Video
- Spring

- PHP/MySQL
- HTML

PHP Developer Nova Itech March 2006 - January 2008 1 yrs 10 mos

- Develop front-end and back-end websites

- Skills: php,mysql,html,css,javascript

Websites

We have build various websites for many different clients

My Contributions:

- Build HTML/CSS page from PSD files then use PHP, SQL, HTML, CSS, JavaScript to build dynamic websites (front-end and admin portal)

Skills: PHP, SQL, MySQL, HTML, CSS, JavaScript

Websites is professional and nice. It has many functions and client used for a long time.

- HTML
- CSS
- JavaScript
- MySQL
- PHP
- PHP/MySQL
- SQL

Education September 1999 - June 2006

Ho Chi Minh City University Of Technology

Engineer's Degree, Information Technology
