PERSONAL PROJECTS

SET-A visual perception game using Flutter

- It is an implementation of popular game "Set". In the game, certain combinations of three cards are said to make up a set.
- For each one of the four categories of features color, number, shape, and shading the three cards must display that feature as either all the same, or all different.
- This project aims to bring the fun and simplicity of card game with network feature. It will have the multiplayer feature that will allow four players to play the game over a network.
