Projects Experience

- **CiaoIM – Instant messaging:** This project is basically a free messaging and calling app that allows you to instantly connect with family and friends. It's all-in-one communication app which features instant text and voice messaging, audio and video calls and group chats.

Technologies Used: Android Studio

- **Lula – Shuttle app (Driver App):** Lula Shuttle App is the easiest and fastest way to book a shuttle in your city just like Uber and Ola. You can browse your Shuttle route on map. You can also track your bus in real time and plan your travel in advance.

Technologies Used: Android Studio

- **Syndicate GymApp:** This is a gym App with which user can schedule his gym timings, whether he wants to work out alone or with others. The user can set his goals and can accept challenges set by the owner. And even can share his challenges on timeline so other can like and comment.

Technologies Used: Android Studio

- **Cnema – A VOD Application:** Cnema is a video portal that lets you watch TV Serials, Movies, News and LIVE sports on your device. You can watch the videos whenever & wherever you want rather than waiting for broadcasting time. User can also browse the trending, latest. Recommended as well as last played videos.
