### EXPERIENCE RELATED TO DEGREE(BCS) Semester PROJECTS:

- Successfully make an ecommerce website in both MEAN and MERN stack
- Successfully make an online pizza website in php

### EXPERIENCE RELATED TO FYP:

- I have completed the Final Year Project which is a social network platform for researchers.
- Having 6 main modules:
  - **Crawler:** Dynamical scrap authors from university/organization faculty web page and then crawl their publications and other important

information from other external sources. Also crawl data at runtime on search if not found in Database.

- **Social Network Analysis:** Apply algorithms to our network (Author Coauthor relation) to calculate and show Indegree cardinality, Closeness cardinality and Betweenness cardinality.
- **3D Visualization:** 3D graphical visualization of Network (Author Coauthor relation).
- **Search/Filter:** Search author, publications, fields all at one place , and highlight these in 3D graphical visualization of Network.
- **Recommendation:** The purpose of this module is to recommend publications to registered user based on their searching with time
- **Forum and rating:** Platform for queries against every publication, where user interact with, help, and rate each other
- **Search and Filter results:**
