Profile

I have interest in both android and web application development. My recent android application (FYP) led my interest towards android development. Prior to it i have worked on web front as well as back-end.I want to work as a full stack developer whether it is android or web domain and to utilize my skills to solve real word problems.

Education

- **BS Computer Science**
  Comsats University, Islamabad | 2016 - 2020
  Data Structures and algorithm, Computer Communication and Networks, Web Programming and Technologies, Scripting Languages, Machine Learning, Artificial Intelligence, Compiler Construction,Digital Logic Design ,Electronics, Android Application Development

Projects

ProductAI (FYP)
Comsats | 2019-2020
Technologies used: **Python** for back-end and **Java** for front-end

Description: It's an android application. Picture of product e.g laptop, mobile phone ,fashion products is taken, after successfully recognition of image, products will be fetched from the two E-commerce platforms Ebay and Aliexpress with their details.Products will be shown to user side by side.User can compare the products, and if user wants to purchase any product, he will have to click on that product, it will take user to website for further actions.Image is also saved with its recognized label from the server into database for future purposes.
