SUMMARY

As a JavaScript expert, I have been working on real-world projects +7 years dealing with a wide spectrum of diverse tasks. In my everyday work, I am a fan of using React.js and Vue.js as frontend technologies and Node/Express, Django as backend technologies.

I love to build well-structured, clean code and clean repositories with maintainable and scalable structure, functional programming. Besides, I like to write code in a high-paced and challenging environment with an emphasis on using best practices to develop high-quality software that meets project requirements, budget, and schedule.

Although I am a perfectionist, I accomplish my work within a reasonable amount of time without detracting from the quality of the product. When working with me you can expect a professional, prompt and friendly service.
