Bachelor degree

WORK EXPERIENCE

Virtev :

Jan 2017 - present

Working as a software developer on various projects. Mainly working as "Full stack" developer, developing React applications with Back End API endpoints within the API platform. We are mainly working here in reactjs. With connection to the third party API service built in node(express) or php(symfony). Currently covering 2 different areas, accounting software application and e-commerce projects. There is also a connection between e-commerce POS terminal and accountant software for tracking and monitoring inventory. Software developer on mini booking project for Germany client. Laravel 5.1 project. Implementing new features and covering all the bugs. Within this company covering different tech stack php(symfony and laravel projects), worked as React and Nodejs developer.

Topssportslab:

05/2015 - 01/2017

Position - Software developer

- Symfony 2 developer with covering administration templates. Project is for monitoring professional training suggestions. Many interesting functionalities and pages for clients like Az Alkmar, South Africa national football team, Uefa arbitrary etc.

Domienova:

04/2014 - 05/2015

Position - Full stack developer

- Working as a full stack developer on a project for selling houses and lands in Canada. Project is built with the symfony2 version.
