## EDUCATION

### College of technical and technological studies

Oct 2003. – Mar 2007

Bachelor degree

## WORK EXPERIENCE

### Virtev :

02/2018 - present

#### Position - Symfony/React developer

I worked for a client who has a lot of their own products. It is a shop and our job was to modify something that they have already done and to suit project needs, because they used the same product on many different projects. Projects are top world brands. We are building POS in react and API in symfony 3.4 and some of them were migrated on symfony 4.

### EtonDigital Ltd:

02/2015 - 01/2018

#### Position - Symfony/React developer

Many different projects, company specialized in Social Network area. But there were lot of different projects. From a recruiting platform(vervoe.com), many social networks, real estate platforms, funding platforms etc Starting from middle of 2016 I started working with React. After that every new project was done with React(Front end web app) and symfony2,3,4 as central API. Standard communication between app and API with using JWT token. My job here was creating Rest API in symfony and working on a React app's. Vervoe was interesting project, we had 3 independent apps in react, hosted on different domain and we had only one central symfony API.

### Smart apps and BtcDraft:

01/2015 - 01/2015

#### Position – Backend developer

Local company in my city, I was the only php developer here working on a different kind of projects. I was usually preferring to go with symfony because I already had lot of experience with that framework.

### Miestefica Ltd :

02/2014 - 01.2015

#### Position - Back End developer

Symfony 2 project started from beginning. This was remote position for a client in Barselona. My job was only symfony side and integration of already developed FE(html/css). So adding html/css and all ajax requests were on my side along with whole backend logic behind.

### SmartNet :

01/2013 -01/ 2014

#### Position - Web Developer

Worked as a web developer on a small symfony applications alongside with covering front end on the project. Worked as a full stack developer. Some projects were static websites with only contact form and some of them were a bit more complex with users, messaging etc...

## LANGUAGES

### English

- Understanding: Excellent in everyday use for technical reading.
- Speaking: Advanced.
- Writing: Advanced.
