## EDUCATION

### Faculty of Electric Engineering

Oct 2005. – Mar 2008

Department of computer science, University of Nis, Serbia.

Working as a developer and problem solver for my mentor and faculty professor. Developing small solutions in matlab and C# meantime developing e-commerce small projects using .NET and PHP

## WORK EXPERIENCE

### Virtev :

Jan 2011 - present

Working as a software developer on various projects. Mainly working as "Full stack" developer, developing React applications with Back End API endpoints within the API platform. With connection to the third party API service built in node(express) or php(symfony). Currently covering 2 different areas, accounting software application and e-commerce projects. There is also a connection between e-commerce POS terminal and accountant software for tracking and monitoring inventory. Implementing new features and covering all the bugs. I can cover different tech stack php(symfony and laravel projects), worked as React and Nodejs developer.

### GreenForges :

05/2015 - present

Co-Founder of the company and head of machine learning. Building architecture and strategy for developing software predictions based on ML and AI.

### Wynd :

01/2018 - 08/2018

#### Position - Full stack developer

- E-commerce startup from Paris, My company is working with them on many different projects. They provide many solutions in the area of e-commerce with already a lot of developed modules that are reused on each project with additional feature development that we are doing alongside with new bundle development.

### Vervoe:

01/2017 - 01/2018

#### Position - Team Lead

- As a team lead I need to take care about every Pull request on github. My main responsibility is helping people to develop features by following software principles and design patterns. I am taking care about new features and project architecture in which direction we are moving. I need to create documents about architecture and share ideas, so every developer will be on the same page.

### Topsportslab:

01/2015 - 01/2018

#### Position - Software developer

- I am symfony developer on this project. They has had legacy in CakePhp and they want to rewrite it in symfony. I am working closely with their main developer on legacy code who is also ICT manager and the guy who knows every detail on the project. Olay Dede is ICT manager on this project, he provides documentation for each module on the project, which I develop by documentation. Currently I am working as a support developer.
