Angular 5+

Team Lead and **Senior Software Engineer** with **5 years** of professional experience. Always looking to be involved in **complex business areas** and enrolling on different responsibilities. During my professional journey I had the chance to get both **leading** and **technical** roles to design and implement multiple subsystems on different projects. Working with **Agile methodologies** and focus oriented on the business outcome of the projects I was able to constantly learn about the software services delivery process.

Work History

2020-05 - Current

Co-founder & Product Development Executive

ABIT Technologies, Brasov, Romania

We started the journey as entrepreneurs by building a start-up company and finalizing the first steps to design the structure of a sustainable business.

We have achieved:

- Defining and creating a Business Plan & Financial Forecast for the next two years;
- Defining our sales funnel;
- Creating our business website;
- We launched our marketing strategy in order to find clients.

2019-03 - Current

Senior Software Engineering

IQuest Technologies, Brasov, Romania

Involved as a Team Lead and Senior Software Engineer in a project with 60+ members, building a Deal Advisory Management Application for a Big Four client.

My key role was to propose technical solutions for different business requirements and coordinate development teams (between 5 and 13 persons) to design, implement, integrate and deliver multiple subsystems.

Responsible for multiple parts of the application such as:

- Developing a complex business document publishing workflow;
- Design and implement a subsystem for Managing the Roles and Permissions for the whole application;
- Integrate Microsoft Power BI to generate visualizations for big data;
- Built solution for managing screenshots of Microsoft Power BI reports/visuals and generating PDF files from draw.io pages;
- PoC for integration of a new WYSIWYG into draw.io to

simplify the tables management

| 2017-11 - 2019-03 | **Software Engineer** |

IQuest Technologies, Brasov, Romania

Involved in multiple Microsoft SharePoint applications designed to manage millions of documents, pages, videos and images using custom business workflows.

Some of the responsibilities that I had were:

- Design and implement a complex user import system based on specific Taxonomy and Roles;
- Create custom Powershell scripts to import client data (more than 60 GB of documents, images and pages) based on a specific business logic;
- Design custom Roles and Permissions system based on the client internal management workflow;
- Create multiple business workflows for: publishing, retention, archiving etc.;
- Create app to authenticate with external service using Federated Authentication;

| 2015-08 - 2017-11 | **Junior Software Engineer** |

IQuest Technologies, Brasov, Romania

Involved in the development of a Publishing farm solutions for SharePoint 2013 where my responsibilities were to clarify, estimate and deliver end to end technical tasks.

Some of the activities were:

- Develop custom SharePoint Web Parts to display client data (documents, images, files, pages);
- Develop custom SharePoint Timer Jobs for analytical purposes;
- Create custom functionality for SharePoint Rich Text Editor to improve the user journey;

Education

| 2016-10 - 2018-06 | **Master of Science: Computer Science And Programming** |

Universitatea Transilvania - Brasov

| 2013-10 - 2016-06 | **Bachelor of Science: Computer Science And Programming** |

Universitatea Transilvania - Brasov
