Web Design

A decent website composition is your key to progress. It is the early introduction of your business on a possible client. An unkempt and ineffectively done plan can harm your image picture which is the reason we construct a custom website architecture customized to meet your business objectives. No two hand crafts are indistinguishable or comparable; our individual plans are planned, conceptualized and worked without any preparation utilizing the most recent strategies and methods. Accordingly, your image radiates through in your online presence.
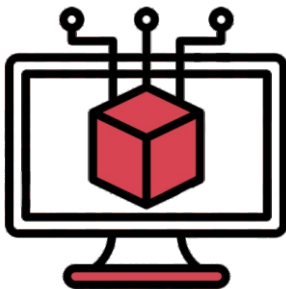

Web Devlopment

Our intelligent web designs developed with cutting-edge web development tools keep your business years ahead of your competitors. Our web development services include:

- Content Management Systems
- JavaScript, JQuery & Ajax Development
- Custom Code

- Payment API Integration
- Store Development
- Shopping Cart Integration

Software Development

Our software experts will evaluate, analyze, explore, and provide you with wide range of solutions. Technical team is strongly focused on developing customer oriented software solutions.

Collaborate with us for top-notch and innovative software solutions at the most economical rates.We provide you with data integration, reliable API, and microservices to improve your software.

Custom Software Development

Full-cycle software development services designed to help your business grow Whether it's custom software engineering, software testing and quality assurance, system integration, technology consulting, or software support — we got you covered. We offer a powerful combination of profound tech expertise, mature, low-risk processes, and proven experience in a variety of business domains to turn your business idea into reality.

Mobile App Development

Mobile apps are preferred over the mobile versions the websites, so come up with some mobile app ideas quickly or discuss your business with a mobile app builder soon, if you haven't done that already. Our talented mobile app developers are experts in building apps for both platforms i.e. Android Application Development and iOS Application Development.
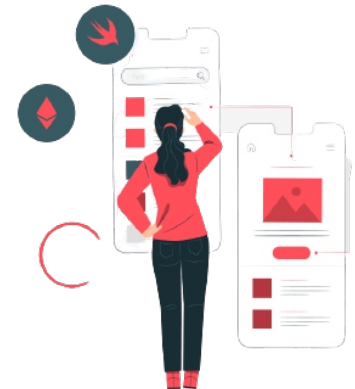

ERP Solution

ERP covers core business functions, including inventory and distribution management, production, and accounting. It supports sales, planning, customer service, Human Resources, logistics, CRM, and more. ERP organizes all your data within a single system. ERP enables smart and balanced decision-making process. We have extensive experience in ERP implementation, customizations and integrations for robust ERP platforms that fit your unique business style.

Our Services

UI / UX Designing

The key to developing a successful app is marrying the functionality your users demand with an intuitive design and experience that make it as simple as possible to use. **E-SALAHKAR** custom UI/UX design specialists will work closely with you to conceive a mobile, desktop or web app that both satisfies its users and meets your specific business and industry requirements. We design and develop innovative digital user experiences that solve complex business problems.

SEO

We follow a unique approach towards strategizing the digital content. We start with understanding your industry dynamics and brainstorm to surface the big idea. Visualization of our idea is what comes next; we create a visual design it, prototype it and develop it for a compelling user experience. Implementation and execution is the last stage where we actually deliver the content to the target audience.

For **E-SALAHKAR**, every client is our topmost priority and we organize a session with you and our team to discuss your business needs.

Digital Marketing

We have the team of digital marketers who have a profound knowledge of the digital marketing and promotion. Visualization of our idea is what comes next; we create a visual design it, prototype it and develop it for a compelling user experience. Implementation and execution is the last stage where we actually deliver the content to the target audience. For us, every client is our topmost priority and we organize a session with you and our team to discuss your business needs.

Our Services

Google PPC/ Facebook Ads

Deciding on how to best invest your marketing budget can often feel like gambling – drop the check in the mail and hope for the best. Instead of taking a chance, our proven keyword and market research-driven PPC strategies will drive your ideal customer to your website when they are actively ready to buy

Data Analysis & Business Development

We provide Business Intelligence (BI) data warehouse services, including the engineering of central repositories, to Extract, Transform and Load (ETL) data from disparate platforms and applications. We can seamlessly construct multiple nodes for data aggregation, securing the data clusters safely in the cloud or on-premises databases for to data mining, filtering and cleansing.

Frequently Asked
Question?

We want you to have the best experience possible when evaluating building or upgrading your system. We accomplish this with true transparency. Below are a few questions we often get asked about our experience and our process. We'd be happy to clear up any questions you might have.

Give us a call at **+91 6307 262 210**

01. What software languages can you develop with?

We are experts with PHP, MySQL, HTMLS, CSS, WordPress, FileMaker Pro, FileMaker Go, C#, SQL, ASP.Net and Java.

02. Is it possible to have our web system integrate with other systems we currently use? Eg. Accounting software.

We have a great deal of experience integrating multiple systems together. Integrations have varying degrees of complexity and we typically have to evaluate your systems to estimate overall cost

03. Can you make my application/website work with mobile devices?

Absolutely. We'll bring your data to the palm of your hand using iOS, Android, and Web development. Our system designs are done with responsive methods in mind. This means that your system will adjust to each users display & look great no matter if viewed on mobile, desktop or any monitor size. Take a look at our mobile development portfolio to get an idea of what we can do for you!

04. Can we create custom reports? I'm not sure exactly what i will need right now.

Every client gets the chance to work through our needs analysis and business requirement definitions and most often we can work out reports that you will need through these phases, but if you truly require fully customized reporting, we can build it.

05. I don't always have the internet where I am.

Not a problem. Our systems can be built so that they will work with local access on your device and then sync once you reconnect to the internet again.

06. Is SEO included in your pricing?

All of our websites are built with search engine optimization in mind. All of our projects are built with clean code and designed to be SEO friendly. Good search engine rankings are based on proprietary algorithms and require ongoing maintenance. We have Google analytics certified staff on site that can review your campaigns if you are interested.

07. Can I update my website/system myself, or will I need you to make changes?

We build to your specifications, which means that if you want greater control, we can build dashboards and tools to help you easily make changes to your system/website. This often requires more up front work so there will be an increased cost
