Experience

Imaginet / Full Stack Developer
December 2022 - Present, Remote

Implement software solutions for a variety of clients and industries using the Microsoft tech stack. Including but not limited to: Angular, SCSS, C#, Entity Framework, .NET, MSSQL.

Work as part of a development team in leadership capacities and otherwise, to ensure quality and timely feature deliveries.

Impact:
Significantly reduce code base size through building and implementing Angular component libraries and leveraging state management tools.

Dramatically increase application performance and response time when working with large data sets using specialized Angular components and creating scalable API endpoints.

Starchup Inc / React Frontend Developer
December 2020 - August 2022, Remote

Oversee the refactoring of legacy Angular.JS SaaS using modern React and implement new ordering features, facility setup and more while being an integral part of every step of the SDLC.

Impact:

Streamline new feature implementation and reduce debugging time through building React component libraries to easily reuse code and implement React-Redux and other redux related frameworks.

Enhanced user experience through modern UI implementation resulting in more efficient workflows.
Faster response times when handling large data sets with real time updates through the consumption and development of RESTful Feathers.Js endpoints and API.

Education

Red River College / Software Development Cert.

September 2019 - July 2020, Winnipeg, MB (Remote Learning)

Working knowledge of OOP, TDD, and agile methodologies. Understand business analytics and business problem solving (ROI calculations etc.). Develop applications using SQL DBs, Java, VB.net, and relevant frameworks.
