

AIMAL KHAN

Full Stack Web Developer | PHP & Laravel Specialist
Peshawar, Pakistan | engraimalkhanzada@gmail.com | +92 332 5674270

PROFESSIONAL SUMMARY

Full Stack Web Developer with 10+ years of experience designing, building, and deploying secure, scalable web applications. Specialized in PHP and Laravel development, custom business systems, REST API integration, and responsive frontend engineering. Comfortable owning a project end-to-end — from database design through deployment and ongoing maintenance — for clients across healthcare, engineering, and education sectors. Known for clean, maintainable code and reliable, on-time delivery.

CORE SERVICES

Full Stack Web Development • PHP / Laravel Development • Custom Web Applications • Admin Dashboards & CRM/ERP • REST API Development & Integration • Database Design & Optimization • Bug Fixing & Maintenance • Performance Optimization • Hosting Setup & Deployment

PROFESSIONAL EXPERIENCE

Full Stack Web Developer — Cybersync Technologies

Jan 2016 – Present

Peshawar, Pakistan

- Develop and maintain custom web applications and business websites for clients across multiple industries.
- Build scalable backend systems using PHP and the Laravel framework, following MVC architecture.
- Design responsive, user-friendly interfaces using HTML5, CSS3, JavaScript, Bootstrap, and jQuery.
- Design, optimize, and manage MySQL databases, including query performance tuning.
- Develop REST APIs and integrate third-party services into client applications.
- Implement authentication, authorization, and application security best practices.
- Debug and resolve complex application issues; optimize page load and application performance.
- Deploy applications to production hosting (cPanel/Linux/Apache) and provide ongoing maintenance.
- Collaborate directly with clients to gather requirements and translate them into working solutions.

Independent Freelance & Founder Projects

Self-directed development — concept through deployment

- Digital Sehat Ghar (dsg.com.pk) — built a PHP/MVC telemedicine platform for the Pakistani healthcare market (KPITB & PSEB registered), featuring doctor booking, manual payment workflows (JazzCash, EasyPaisa, Upaisa), a pharmacy module, and lab-test search.
- AI-Powered Medical Chatbot (asfisays.com) — developed a PHP 8.2 / MySQL chatbot for a pulmonologist's medical blog, with RAG-style knowledge-base search, session-based chat history, emergency keyword detection, and an admin panel; deployed on cPanel hosting.
- EMOS Engineering Services — built a multi-page corporate website (HTML, Tailwind CSS) for a Pakistani EPC/power-infrastructure company with a strong industry-specific visual identity.
- Scholar4Dev (scholar4dev.netlify.app) — developed a scholarship-listing platform using Netlify, Supabase, and Google AdSense integration.
- Business & NGO Websites — delivered full business websites (e.g. Paracha Enterprises, a Peshawar-based general order supplier) including 20+ category pages, partner showcase sections, and image galleries.
