SUMMARY

An experienced react-native developer who specializes in building cross-platform mobile applications from design to specification. I have 7+ years of experience in building production-level mobile & web applications using React/React Native, Flutter, Node, Laravel, and other modern technologies and frameworks.

Skill Set
- UI/UX: Photoshop, Sketch, and Illustrator
- Cross-platform app development: React Native + JavaScript/TypeScript, Flutter
- iOS App Development: Swift, Objective-c, Xcode, iOS SDK
- Android app development: Java, Kotlin, Android Studio & Android Developer Tools and Android SDK
- Backend development: LAMP (Linux, Apache, MySQL, PHP)

I am a quick learner, able to solve business and marketing problems and develop on-point solutions on stringent deadlines. I possess excellent financial, interpersonal, and customer relations skills. I thrive in fast-paced, engaging, and challenging environments where my development prowess can directly impact business efficiency and profitability.

I always understand the problems of the clients and execute them accordingly in real-time with the best way to solve it with high quality and strong mathematical and system control knowledge.

- React Native
- React
- JavaScript
- Typescript
- Flutter
- Swift
- Objective-C
- Xcode

- Java
- Kotlin
- Android Studio
- Android SDK
- PHP
- Laravel
- AWS
- Firebase

EXPERIENCE

Senior React Native Developer

Kirkland, Washington, United States Feb 2022 – May 2022

Guru.com Freelancer

Senior Mobile App Developer(React Native/Java/Kotlin)

Kirkland, Washington, United States
Freelock Computing/ Jun 2019 - Feb 2022
- Built a map-based social network from the ground up using React Native, MapBox, Firebase, Heroku with Node.js, and MongoDB. It used real-time geolocation to constantly update your location so that you can see what's going on nearby.
- Helped convert a website into a truly native React Native app for both iOS and Android for a well-funded startup. I worked with their existing Node/MongoDB stack as well as third-party libraries to create a better experience on mobile.
- Created a cross-platform React Native app for iOS and Android internally for demonstration purposes. Queried APIs with GraphQL for display.

React Native Mobile Developer

Kirkland, Washington, United States Jordan
Crown Web Design/Jan 2016 - May 2017
- Created chat functionality in a trainer enterprise app using React Native, Laravel and PostgreSQL.
- Created an in-house Apple Watch extension to allow users to monitor progress of their workouts and switch exercises.
- Created a script to dig through and piece together over half a million user records stored between CouchDB and PostgreSQL.
- Supported architecture of back-end and REST API creation using Laravel and PostgreSQL.
- Created an admin tool for sending SMS messages with links to install enterprise iOS apps to trainers using Twilio, Laravel, and PostgreSQL.

Flutter Mobile Developer

Washington, United States

Neighborsoft.team/Mar 2013 - Jan 2016
- Helped develop the Challenges section of the GrowthDay app, implementing and iterating across UI designs and ensuring UX engagement was on point.
- Collaborated with the back-end team, ensuring API calls were integrated properly and working with the QA team on any issues that were discovered.
- Took existing iOS and Android native libraries that were not yet Flutter ready and made them so they could be used in our app.

EDUCATION AND TRAINING

University of Washington Bothell
Bachelor's degree, Computer Science
Sep 2008 - May 2012
